8K Multistage Centrifugal Pumps

Designed for long-life and trouble free service, the 8K series are a superior line of multistage centrifugal pumps. Originally engineered for booster, water purification, and hot water applications, many other industries have adopted this product due to its reliable performance.

The 8K series are truly an industrial grade pump, consisting of 304 or 316 SS hydraulic assemblies constructed with cast stainless steel flanges for maximum installation support. Different mechanical seal face options are available and incorporate a separate thrust bearing in place of motor bearings, adding to the robust design of this product. The 8K also features tungsten carbide lower pump bearings and sleeves – standard construction for all services, providing maximum operating life. Count on the 8K to get the job done.

Features:

- All stainless steel wetted parts (8K, 8KC feature 304SS – 8KS feature 316SS)
- All Viton elastomers (other materials available for special applications)
- Available with standard NEMA motors
- Built in thrust bearing allows the use of standard off the shelf motors without the need for stack adjustment (3HP and larger)
- Air vent located at the top of casing cover prevents air entrapment causing run dry conditions during start up
- Dimensions and flanges built to industry standards to allow easy retrofit of existing systems
- Optional cartridge size on 32, 45 and 64 series
- Reinforced Impellers and bowls eliminates flexing during operation

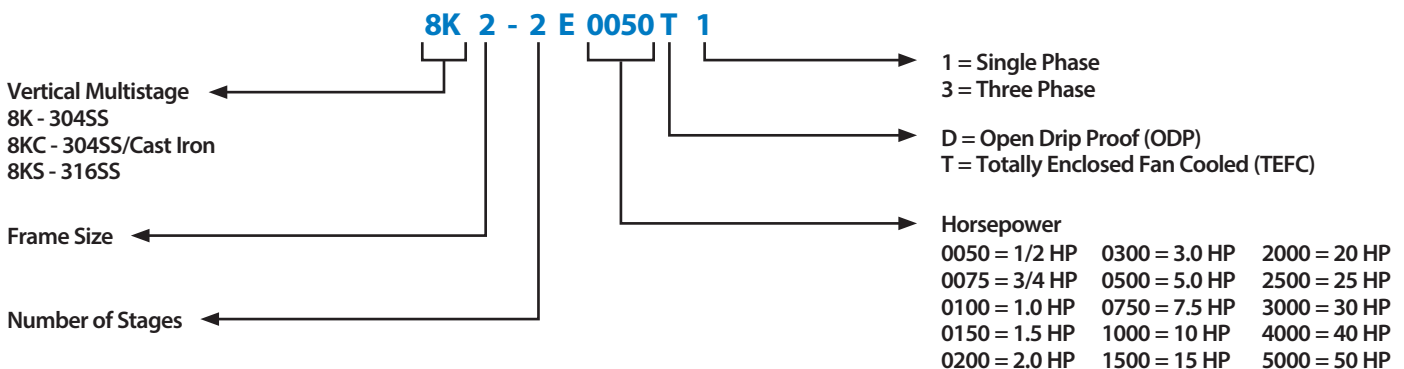

Applications:

- Water Boosting
- Water Supply
- Reverse Osmosis
- Washing Systems
- Boiler Feed
- Fire Misting
- Water Treatment
- Irrigation
- Sprinkler Systems
- Heat Exchangers
- Filtration
- Jockey Pump Service
- Circulation Systems

Materials:

- 8K – 304SS
- 8KC – 304SS/Cast Iron
- 8KS – 316 SS

Additional Centrifugal Pumps

304 Stainless Steel Casing

Centrifugal pumps offer solutions for high-flow, low-pressure industrial pumping needs. Typical fluids pumped include fresh water or liquids with some suspended solids. Below is a sampling of popular centrifugal models that include the pump, seal and motor. Most of the pumps listed are rated at 3450 rpm, but many models are available at 1725 rpm.
