

GIGA TIMER Model # GT 200

POWER SAVINGS LED'S TWO TIMER FOR BAYS / VACUUMS & ELSEWHERE

****2-YEAR WARRANTY on LED'S****

U.S. PATENT # 5,371,681

Model #GIGA TIMER GT 200

The new Giga Timer GT 200 is a compact multi-feature display timer, which has many standard features including multi-value timing with count-down or count-up, the IDX "CARD-DISPLAY PROTOCOL" IDX patented feature "Two Time Select" and "LUCKY TIME™". This new model exhibits a +20% reduction in power consumption over the LTT802 series and carries a 2-year warranty on the LED's. The GT 200 series will be found throughout the modern car wash in everything from the bay meters, vacuums & combo vacuum machine to camp ground RV dump stations.

The patented Two Time Select feature enables multi-value timing by allowing the car wash owner to program two different times and / or values for start up, specials, or services. To utilize the Two Time Select feature, simply connect the gray wire to the switch position of the more expensive services, like high-pressure pump, spot-free or fragrance in a combo vacuum. The GT 200 will automatically recalculate and display the new (higher or lower) remaining time for either value service instantly upon its selection by the customer. Another use is to offer special discounts like a "Late Night" or "Double Time Day" specials. The Two Time Select multi-value timing / pricing feature have increased profits for the car wash operator ever since its release in 1994.

IDX has greatly increased the maximum length of the three personalized scrolling messages in the GT200 from 32 to 127 characters each. This change allows the owner to fully customize the three messages - "Welcome", "Sales" and "Exit" to fit his needs. The GT 200 is field-programmable when the RC 800 handheld remote or wirelessly VIA WT-RAM to the SCADA Wash™ controller and the WICKETS-NTS™ cloud server.
