

Magic Mist Car Fragrance
SAFETY DATA SHEET

1
3/4/16

SECTION 1 - Product Identification

Product Name: Oil Based Fragrance (Lemon Twist)
Generic Name: Liquid Air Freshener
Supplier: Magic Mist Car Fragrance
5301 Stadium Blvd.
Jonesboro, AR 72404

General Use: Air Freshener
Product Description: Non-aqueous Auto Fragrance

SECTION 2- Composition

	%	CAS Registry #
Isopropyl Alcohol	1-5	67-63-0
Fragrance	1-5	Not Applicabl
Component B	85-97	Trade Secret

OSHA HAZARDIOUS COMPONENTS (29CFR1910.1200)

EXPOSURE LIMITS IN 8 HRS. TWA (PPM)

ACGIH TLV

Fragrance	Eye Irritant	None Established
Component B	Combustible Liquid	400 ppm
Isopropyl Alcohol	Eye Irritant, flammable	400 ppm

SECTION 3 - Hazardous Identification

Emergency Overview: Prolonged and or repeated contact may cause mild irritation or redness to eyes and skin.

Physical state: Liquid
Color: Transparent

Precautionary measures: Use personal protective gear and appropriate handling measures to control/reduce hazards associated with contact with eyes, skin, ingestion, inhalation, and environmental release.

Routes of entry

Potential acute health effects

Inhalation: May be irritating to the mucous membranes to the nose, throat, or lungs. Choking, coughing, or headache may occur.
Ingestion: May cause irritation to the mouth, throat, and gastrointestinal system. Large amounts may cause vomiting and diarrhea.
Skin: May cause redness or Swelling. Prolonged or repeated contact may cause dermatitis.

SECTION 4 - First Aid Measures

First Aid for Eye: Check for and remove any contact lens. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately.

First Aid for Skin: In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse.

First Aid for Inhalation: Move exposed person to fresh air. If not breathing, is irregular or if respiratory arrests occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as collar, tie, belt, or waistband. Get medical attention immediately.

SECTION 5 - Fire Fighting Measures

Flash point (°F)	N/A
Extinguishing media	Nonflammable
Special exposure hazards	None Known
Decomposition products	Alkaline vapors in fire
Special Protective equipment for fire fighters	None known

SECTION 6 - Accidental Release Measures

Personal precautions No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spill material. Do not breath vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal equipment.

Environmental precautions Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains, and sewers. Inform the relevent authorities if the product has caused environmental pollution.

Methods for cleaning up

Small spills: Clean up spills immediately. Absorb spill with inert material (e.g., sand, or earth), then place in a chemical waste container.

Large Spills: Evacuate area of all unnecessary personnel. Protect from ignition. Absorb spill with inert material (e.g., sand, or earth), then place in a chemical waste container. Avoid runoff into storm sewers and ditches, with lead to waterways.

SECTION 7 - Handling and Storage

Handling & Storing:

Put on appropriate personal protective equipment. Eating, drinking, and smoking should be prohibited in areas where the material is handled, stored, and processed. Workers should wash hands and face before eating, drinking, and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Do not breathe vapor or mist. Do not swallow. Avoid contact with eyes, skin, clothing. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or approved alternative made from a compatible material, keep tightly closed when not in use. For industrial use only.

Storage:

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool, and well ventilated area, away from incompatible materials and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

SECTION 8- Exposure Controls/Personal Protective Equipment

Ingredient:

Exposure limits

ACGIH TLV (United States).

TWA:

hours

Recommended monitoring procedures:

If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessary to use respiratory protective equipment. Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

Engineering measures:

Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Hygiene measures:

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothes before reusing. Ensure that eyewash station and safety showers are close to the workstation location.

SECTION 8- Exposure Controls/Personal Protective Equipment (cont'd)

Personal protection

- Respiratory:** Use a properly filled, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
- Hands:** Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates it is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
- Eyes:** Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. If contact is possible chemical splash goggles should be worn (unless the assessment indicates a higher degree of protection).
- Skin:** Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Environmental exposure controls** Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters, or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

SECTION 9 - Physical and Chemical Properties

Physical state	liquid (mobile, liquid)
Flash point (°F)	N/A
Appearance @ 70°F	liquid (mobile, liquid)
Boiling point (°F)	212
Specific Gravity	1.04
Vapor density	(air = 1) >1
Evaporation rate	(water = 1) < 1
PH	7 to 8
Solubility in water	Soluable

SECTION 10 - Stability and Reactivity

Chemical Stability: Stable

Conditions to avoid: None known

Incompatible materials: None known

Hazardous decomposition products: None known

Hazardous Polymerization Under normal conditions of storage and use, hazardous reactions will not occur.

SECTION 11 - Toxicological information

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
No data provided at this time				

Chronice toxicity

Conclusion/Summary No data available at this time

Carcinogenicity

Conclusion/Summary No data available at this time

Mutagenicity

Conclusion/Summary No data available at this time

Teratogenicity

Conclusion/Summary No data available at this time

Reproductive toxicity

Conclusion/Summary No data available at this time

SECTION 12- Ecological Information

Ecotoxicity No data available at this time

Aquatic exotoxicity

Conclusion/Summary No data available at this time

Persistence/degradabilty

Conclusion/Summary Inorganic. Soluble silicates, upon dilution, rapidly depolymerise into molecular species indistinguishable from natural dissolved silica. They combine with ions like Ca, Mg, Fe, Al and others to end up as insoluble compounds similar to constituents of natural soils.

SECTION 13 - Disposable Considerations

Water disposal

The generation of waste should be avoided or minimized whenever possible. Disposal of this product, solutions and any-by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Disposal of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. The material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterway, drains and sewers.

SECTION 14 - Transportation

Regulatory Information	UN Number	Proper shipping name	Classes	PG*	Label	Additional Information
DOT Classification	Not regulated					
IMDG Class	Combustible		3	3		UN1268
IATA-DGR Class	Combustible		3	3		UN1268

PG* Packing Group: III

SECTION 15 - Regulatory Information

313 Reportable ingredients:

<u>CHEMICAL NAME</u>	<u>CAS NUMBER</u>	<u>CONCENTRATION</u>
Glycol Ether	N/A	≤5.0%

SECTION 16 - Other Information

Neither this data sheet nor any statement contained herein grants or extends any license, express or implied in connection with patents issued or pending which may be the property of the manufacturer or others.

Information in the Data Sheet has been assembled by the manufacturer based on its own study and on the work of others.

The manufacturer makes no warranties, expressed or implied as to the accuracy, completeness or adequacy of the information contained herein.

The manufacturer shall not be liable (regardless of fault) to the vendee, the vendee's employees or anyone for the direct, special or consequential damages arising out of or in connection with the accuracy, completeness, adequacy or furnishing such information.
