

CryptoPay/Nayax Side Mount Box - Vacuums & Bays

Part # 399-120 CryptoPay Swipe & LED 7 Timer

Part # 399-130 CryptoTap Only, No Timer

Part # 399-140 Nayax Touch, No Timer

Part # 399-145 Nayax Touch & LED 7 Timer

Don't have enough room on your vacuum meter faceplate to mount your CryptoPay swipe or Tap, Nayax unit, and a new timer? This bi-directional design enables mounting on either the left or right side of your vacuum meter box or side of any surface near your equipment. The box is prepared to mount the Dixmor LED 7 timer, CryptoPay swiper, CryptoTap touchless unit, or Nayax swipe.

Components:

- Side mount box – made up of a base and a cover
- 2 tubular locks w/2keys – keyed alike
- Front Door Panel is unique to each arrangement of products, all holes and fasteners included
- Size: 11¼" H x 5¼" W x 3½" D (outside) – made from stainless steel

Items not included – Purchase Separately – According to Box Style:

- CryptoPay swiper – vacuum or bay style with bare wires and button
- CryptoTap touchless unit
- Dixmor LED 7 timer (optional purchase is the Dixmor lexan lens plate)
- Dixmor wire harness for LED 7.
- Nayax Touch swiper with antennae and cabling
- Your choice of mounting fasteners for the (up to 8) ¼" diameter holes in box

Installation:

Locate Side Mount Box and mark the side of your surface for box mounting. Drill your choice of holes in mounting surface (box has ¼" diameter holes). Drill or knock out a wire clearance hole (3 choices) in the mounting surface to allow component wires into your meter box.

Complete wire connections per your equipment, Dixmor, CryptoPay, or Nayax instructions. We suggest a small bead of silicone caulk at the top surface corners to stop water intrusion. The box is not designed to be waterproof, aim to protect wire connections.

Options:

Part # 399-127

Side Panel Cover – stainless plate used to cover all holes on the side mount box, if they are exposed from a non-side mount situation.
