

■ USA Cable Solutions

Lutze Flexible Cable and Wire Management for Industrial Automation

Control Cable
Flexible Tray-ER Cable
High Flexing Cable
Motor & VFD Cable
Ethernet Cable
Cable Fittings and Accessories
NPT, Pg, Metric Fittings

Lutze: Your ultimate Partner in flexible and continuously flexing cable.

DES/NA RoHS

- UL/CSA/CE and Tray-ER approvals
- NFPA 79 compliant cables available
- Accepted by the Automotive Industry
- Suitable for the North American market
- Standard size reels available
- We cut cable to any length compliant with “UL processed wire respooled” procedure
- No minimum length required for standard items
- Low minimum order
- Our goal is “On time-All the time”.

From products to solutions!

Flexible Cables

Lutze Silflex® for Flexible and Stationary Applications

Lutze Silflex® N PVC, Unshielded

Flexible Control Cable with UL/CSA/CE Approvals

Application

- Multi-conductor control cable for machine and plant construction, HVAC technology, assembly and production lines, and many other industrial applications
- Easy strip design specially suited for cable assemblies

Characteristics

- Most flexible design without Nylon for easy stripping and easy installation
- Easy routing and bending due to flexibility
- Specially formulated gray PVC jacket for oil resistance
- Resistant to mineral oils, coolants and solvents
- Non-wicking fillers
- RoHS compliant

Technical Data

Voltage	600V UL AWM
Temperature	-40°C - +90°C static
Bending radius	4 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground; * no ground included
Approvals	UL AWM Style 2587, VW-1, Oil Res I & II CSA AWM, I/I A/B FT4 CE RoHS

Construction

- Flexible stranded bare copper conductors
- PVC insulation
- Gray PVC jacket, compliant Oil Res I & II
- Other jacket colors available

Lutze Silflex® N (C) PVC, Shielded

Flexible Control Cable with UL/CSA/CE Approvals

Application

- Shielded multi-conductor control cable for machine and plant construction, HVAC technology, assembly and production lines, and many other industrial applications
- Control applications where shielding is required
- Easy strip design specially suited for cable assemblies

Characteristics

- Most flexible design without Nylon for easy stripping and easy installation
- Easy routing and bending due to flexibility
- Specially formulated gray PVC jacket for oil resistance
- Resistant to mineral oils, coolants and solvents
- Non-wicking fillers
- RoHS compliant

Technical Data

Voltage	600V UL AWM
Temperature	-40°C - +90°C static
Bending radius	6 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground; *no ground included
Approvals	UL/CSA/CE Oil Res I & II RoHS

Construction

- Flexible stranded bare copper conductors
- PVC insulation
- Tinned Copper braided shield
- Gray PVC jacket, compliant Oil Res I & II
- Yellow PVC jacket also available

Lutze Silflex® Control-ER PVC, Unshielded

Flexible Control and Tray Cable with UL/TC-ER/WTTC/MTW/CSA/CE Approvals

Application

- Multi-conductor cable for tray and control applications, with **exposed run** (open wiring) approval
- Compliant with **NFPA 79** requirements
- **TC-ER** for use on machines and in cable trays **without conduit**, which can reduce material and labor costs
- Machine tools, machine and plant construction, HVAC technology, assembly and production lines, and other industrial applications
- **WTTC** – wind turbine tray cable rating for use in wind power generation
- Dry, damp or wet locations

Characteristics

- Flexible design with Nylon for crush impact resistance per UL 1277 and easy installation
- Specially formulated jacket for oil resistance
- Gray jacket for control cable applications according to DESINA
- Non-wicking fillers
- RoHS compliant
- Sunlight resistant
- Direct burial
- UL Type TC-Exposed Run
- Dry or wet conditions
- Talc free
- Silicone free

Technical Data

Voltage	600V UL TC 1000V WTTC
Temperature	-40°C - +90°C static
Bending radius	4 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground *no ground included
Approvals	UL Type TC-ER UL/AWM/CSA/CE (UL) Type MTW or DP-1 WTTC Class 1 Div. 2 per NEC Art. 336, 392, 501 C(UL) TC and CIC FT4 UL 1277, RoHS Oil Res II

Construction

- Flexible fine wire stranded bare copper conductors
- PVC/Nylon insulation
- Oil resistant gray PVC jacket

Lutze Silflex® Tray-ER PVC, Unshielded

Flexible Tray Cable with UL/TC-ER/WTTC/MTW/CSA/CE Approvals

Application

- Multi-conductor cable for tray applications, with **exposed run** (open wiring) approval
- Compliant with **NFPA 79** for machine tool wiring
- **TC-ER** for use with cable trays **without conduit**, which can reduce material and labor costs
- Machine tools, machine and plant construction, HVAC technology, assembly and production lines, and other industrial applications
- **WTTC** – wind turbine tray cable rating for use in wind power generation (approval effective as of 03/2009)
- Dry, damp and wet locations

Characteristics

- Flexible design with Nylon for crush impact resistance per UL 1277 and easy installation
- Specially formulated jacket for oil resistance
- Non-wicking fillers
- RoHS compliant
- Sunlight resistant
- Direct burial
- UL Type TC-Exposed Run
- Dry or wet conditions
- Talc free
- Silicone free

Technical Data

Voltage	600V UL TC 1000V WTTC
Temperature	-40°C - +90°C static
Bending radius	4 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground
Approvals	UL Type TC-ER UL/CSA/CE UL AWM, Oil res I, UL 83 (UL) Type MTW or DP-1 WTTC Class 1, Div. 2 per NEC Art. 336, 392, 501 C(UL) TC and CIC FT4 UL1277, RoHS Oil Res II

Construction

- Flexible fine wire stranded bare copper conductors
- PVC/Nylon insulation / THHN - THWN

Lutze Silflex® (C) Tray-ER PVC, Shielded

Flexible Shielded Tray Cable with UL/TC-ER/WTTC/MTW/CSA/CE Approvals

Application

- Shielded multi-conductor cable for tray applications, with exposed run (open wiring) approval
- Compliant with NFPA 79 for machine tool wiring
- TC-ER for use with cable trays without conduit, which can reduce material and labor costs
- Machine tools, machine and plant construction, HVAC technology, assembly and production lines, and other industrial applications
- WTTC – wind turbine tray cable rating for use in wind power generation (approval effective as of 03/2009)
- Dry, damp and wet locations

Characteristics

- Flexible design with Nylon for crush impact resistance per UL 1277 and easy installation
- Specially formulated jacket for oil resistance
- RoHS compliant
- Sunlight resistant
- Direct burial
- UL Type TC-Exposed Run
- Dry or wet conditions
- Talc free
- Silicone free

Technical Data

Voltage	600V UL TC 1000V WTTC
Temperature	-40°C - +90°C static
Bending radius	6 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground
Approvals	UL Type TC-ER UL/CSA/CE UL AMW, Oil res I, UL 83 (UL) Type MTW or DP-1 WTTC Class 1, Div. 2 per NEC Art. 336, 392, 501 C(UL) TC and CIC FT4 UL1277, RoHS

Construction

- Flexible fine wire stranded bare copper conductors
- PVC/Nylon insulation
- Shielded with foil tape, tinned copper braid and drain wire
- Oil resistant black PVC jacket

Lutze Silflex® Tray-ER Blue PVC, Unshielded

Flexible Control and Tray Cable with UL/TC-ER/CSA/CE/NOM Approvals, Blue Conductors for 24V Applications

Application

- Multi-conductor cable for tray applications, with **exposed run** (open wiring) approval
- Machine tools, machine and plant construction, HVAC technology, assembly and production lines, and other industrial applications
- **Automotive** applications with 24 Volt
- MTW rating as required per **NFPA 79** for machine tool wiring
- TC-ER for use on machines and in cable trays without conduit

Characteristics

- Flexible design with Nylon for crush impact resistance per UL 1277 and easy installation
- Specially formulated jacket for oil resistance
- Non-wicking fillers
- RoHS compliant
- Sunlight resistant
- Direct burial
- UL Type TC-Exposed Run
- Dry or wet conditions
- Talc free
- Silicone free

Technical Data

Voltage	600V UL TC 1000V UL AWM
Temperature	-40°C - +90°C static
Bending radius	4 x cable OD
Conductor marking	Blue with white numbers; No. 2 is white with a blue stripe and one green/yellow ground; *** only two blue with white numbers and one green/yellow ground, no white stripe
Approvals	UL Type TC-ER UL/CSA/CE/NOM UL AWM, Oil res I, UL 83 (UL) Type MTW or DP-1 Class 1, Div. 2 per NEC Art. 336, 392, 501 C(UL) TC and CIC FT4 UL1277, RoHS

Lutze Silflex® N PUR, Unshielded

Flexible Control Cable with UL/CSA/CE Approvals

Application

- Multi-conductor cable for machine tools, handling equipment, machine and plant construction, transport and conveying technology

Characteristics

- Flexible for easy installation
- PUR jacket for highest oil and abrasion resistance
- Non-wicking fillers
- RoHS compliant
- Talc free
- Silicone free

Technical Data

Voltage	600V UL AWM
Temperature	-40°C - +80°C
Bending radius	4 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground

Approvals	UL/CSA/CE RoHS

Lutze Silflex® N (C) VFD PVC 0.6/1kV, Shielded

Flexible VFD & Motor Cable with UL/TC-ER/WTTC/MTW/CSA/CE Approvals

Application

- Shielded multi-conductor cable for VFD and Motor applications to connect power from drives to motors
- Cable design for harsh industrial environments and operating conditions with high noise levels
- Due to semi-conductive layer suitable for applications with high voltage spikes and long cable runs
- Compliant with **NFPA 79** for machine tool wiring
- **TC-ER** for use with cable trays **without conduit**, which can reduce material and labor costs
- WTTC – wind turbine tray cable rating for use in wind power generation

Characteristics

- Flexible design with Nylon for crush impact resistance per UL 1277 and easy installation
- Very round cable with small Diameter
- Specially formulated jacket for oil resistance
- Semi-conductive layer prevents premature cable failure and reduces corona effects, thus increasing the reliability and lifetime (production after 05/2009)
- Non-wicking fillers
- RoHS compliant
- Sunlight resistant
- Direct burial
- UL Type TC-Exposed Run
- Dry or wet conditions
- Talc free
- Silicone free

Technical Data

Voltage	600V UL TC 1000V WTTC
Temperature	-40°C - +90°C static
Bending radius	6 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground
Approvals	UL Type TC-ER UL/AWM/CSA/CE UL MTW or DP-1 WTTC Class 1, Div. 2 per NEC Art. 336, 392, 501 C(UL) TC and CIC FT4 UL 1277 RoHS

Construction

- Flexible fine wire stranded tinned copper conductors for improved electrical characteristics and reduced oxidation
- PVC/Nylon insulation with semi-conductive layer
- Shielded with foil tape, tinned copper braid and drain wire
- Oil resistant black or orange PVC jacket

Lutze Electronic PVC, Unshielded

Flexible Electronic Cable with UL/CSA/CE Approvals

Application

- Industrial grade electronic cable for machine tools, process controls, computer peripherals, HVAC technology, assembly and production lines, and other industrial applications

Characteristics

- Flexible for easy installation
- Easy strip design
- Color coded conductors
- Specially formulated jacket for oil resistance
- Premium durability
- RoHS compliant
- UL listed and NFPA 79 compliant**

Technical Data

Voltage	300V UL AWM
Temperature	-20°C - +80°C AWM -20°C - +75°C CM
Bending radius	4 x cable OD
Conductor marking	See table
Approvals	UL Type CM, AWM Style 2464, 300V, VW-1, CSA PCC FT4 CE RoHS

Construction

Lutze Electronic PLTC PVC, Shielded

Shielded Flexible Electronic Cable with UL/CSA/CE/PLTC Approvals

Application

- Double shielded industrial grade PLTC electronic cable for machine tools, process instrumentation and controls, computer peripherals, HVAC technology, assembly and production lines, low voltage interconnect and other industrial applications including installation in cable trays

Characteristics

- Flexible for easy installation
- Easy strip design
- Color coded conductors
- Specially formulated jacket for oil resistance
- Premium durability
- Extended temperature range
- RoHS compliant
- UL listed and NFPA 79 compliant

Technical Data

Voltage	300V
Temperature	-25°C - +105°C
Bending radius	6 x cable OD
Conductor marking	See tables
Approvals	UL Type PLTC CMG AWM Style 2464 VW-1, CSA CMG/FT4 AWM II A/B CE Oil Res II Meets NEC 725, 760, 800 Class I Div. 2 (PLTC use only) RoHS

Construction

- Flexible stranded tinned copper conductors
- Shielded with foil tape, tinned copper braid and full size drain wire
- PVC insulation
- Oil resistant gray premium PVC jacket

Lutze ETHERNET/ProfiNet Network Cable (C), Shielded PVC

Flexible ETHERNET Network Cable with UL/CSA/CE Approvals

Application

- Flexible Industrial Field Network cable for Fast Ethernet applications
- UL listed and compliant with NFPA 79 2007 requirements

Characteristics

- Shielded for optimal data integrity in industrial environments
- Silicone/Talc free
- RoHS compliant

Technical Data

Impedance	100 Ω +/- 10% (1-100 MHz)
Loop Resistance	
AWG22	<110 Ω/km
AWG24	<165 Ω/km
AWG26	<273 Ω/km
Operating capacitance	< 50 pF/m
Nominal Voltage	250V
Test Voltage	1500V
Temperature	
Moving	-5°C - +75°C, CMG
Fixed	-30°C - +75°C, CMG
Bending radius fixed	6 x cable OD
Approvals	UL/CSA/CE CMG UL 1581 UL VW-1; CSA FT1 IEC 60332-1 RoHS UL listed and meets NEC 800

Construction

- Bare copper conductor per AWG
- Polyolefin insulation
- Tinned copper braid > 85%

Lutze Single Conductor, Unshielded Hook Up Wire

Flexible Single Conductor Hook Up Wire with UL/CSA/CE/MTW and HAR Approvals

RoHS HAR

Application

- Single-conductor cable for wiring of cabinets and use in electrical and electronic equipment
- Specially suited for machines exported to Europe
- MTW rating as required per NFPA 79 for machine tool wiring

Characteristics

- Very flexible for easy installation
- MTW rated

Technical Data

Nominal voltage	H05V-K 300/500 V, H07V-K 450/750 V, UL 600 V, style 1015
Test voltage	3000V
Bending radius	Fixed: 5 x cable OD
Temperature	Flexible -5 to +105°C Fixed -40 to + 105°C H05/H07 up to +90°C
Conductor stranding	Fine wire, tinned copper per VDE 0295
Insulation resistance	> 10 GΩ x cm
Approvals	H05V-K <= AWG 18: HAR UL 1063 MTW Listed UL AWM 1015 CSA TEW H07VK => AWG 16: HAR UL 1063 MTW Listed UL AWM 1015 CSA TEW

High Flexing Cables

Lutze Superflex®, Lutze Superflex® Plus for Continuously Moving/Flexing Applications, C-track

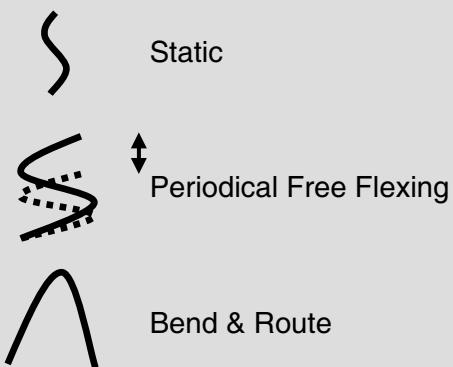

Handling and Installation Lutze Superflex® – Quick Overview

1) Selecting Cables for Continuous Motion Applications – C-Tracks

We recommend special high flexing cables such as Lutze Superflex® cables, for use in C-tracks to ensure long life times:

- All Lutze Superflex® cable is proven to be compatible with all major brands of C-tracks.
- Lutze Superflex® N is designed for moderate flexing in short to medium length C-tracks.
- Lutze Superflex® Plus PUR is designed for high performance flexing or longer C-tracks.

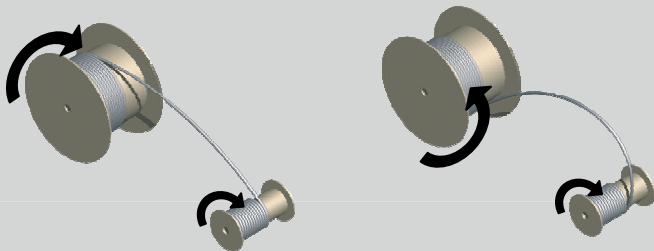

High Flexing Cables such as Lutze Superflex® cables, are different from standard flexible cables:

Standard Flexible Cables	High Flexing Cables - Lutze Superflex®
	
<ul style="list-style-type: none">• Low number of strands per conductor• longer pitch layering• designed as a pliable cable for easy routing and installation	<ul style="list-style-type: none">• high number of super fine strands per conductor• short pitch layering• conductors are cabled without back twist• higher quality of materials• slower and more complex manufacturing process on high-end equipment• designed for linear constant motion
 <ul style="list-style-type: none">• no central core• mostly PVC as insulation material• foil shield or braid shield• jacket material depends on application	 <ul style="list-style-type: none">• central core for single layer construction• special PVC or TPE as insulation material• tinned copper braid shield• high abrasion resistant jacket material such as PUR

Handling and Installation Lutze Superflex® – Quick Overview

2) Correct Handling of Lutze Superflex® Cables

- When unreeling the cable, do not change the bend direction. The cable has to go on the new reel in the same direction it came off the reel. Low and equal tensile force during spooling!

DO ✓

DO NOT ✗

- Ring put ups require careful uncoiling by rolling the ring upright over the floor.

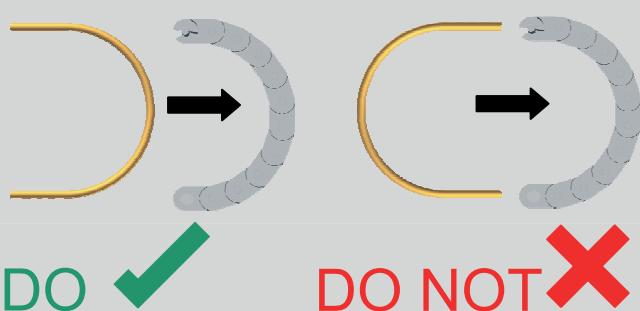

- Do not twist the cable when unwinding. Always unwind straight from spool.

DO NOT ✗

3) Correct Installation of Lutze Superflex® Cable

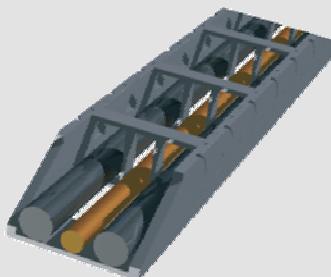

- Cable retains bend from reel. Do not flex against original bend or relax cable for 24 hrs by laying it flat.

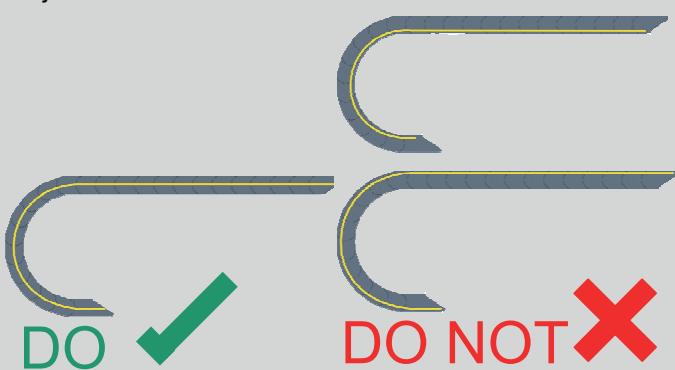

- Use dividers horizontally and vertically to separate the track into separate cavities. Install just one cable per separated cavity. If absolutely necessary, two small or a small and a big cable can share a cavity.

- Try to ensure balanced weight distribution. If you have more than one heavy cable, we recommend installing the heavy cables evenly to each side of the track.

- Observe the minimum bending radius for optimum performance. Make sure that all cables are length-adjusted and run in the neutral zone.

For further information please visit: www.lutze.com/superflex

Lutze Superflex® N PVC, Unshielded

High Flexing Control Cable with UL/CSA/CE Approvals

Application

- Suitable for control, monitoring and instrumentation applications with continuous flexing cycles
- For flexing applications such as C-tracks and other applications where linear flexing occurs
- Compatible with all major brand C-tracks

Characteristics

- Extremely small cable ODs due to special **TPE High Glide Insulation** compliant with UL
- TPE/PVC combination preferable over PVC/PVC
- Low capacitance
- Very flexible with superfine stranding
- Specially formulated PVC jacket per UL Class 43
- Non-wicking fillers
- Abrasion, high wear and tear resistance
- Hydrolysis, microbe and decompose resistant
- Talc free
- Silicone free
- RoHS compliant
- Dry and wet conditions

Technical Data

Voltage	600V UL AWM
Test voltage	3000 V
Insulation resistance	Min 100 MΩ x km
Temperature	Moving -5 - +90°C Fixed -25 - +90°C
Bending radius	Moving 7.5 x cable OD Fixed 4 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground
Burning behavior	Flame-retardant per UL VW-1, DIN EN 50265-2-1
Oil resistance	Oil resistant per UL 4D100C and DIN EN 60811-2-1

Construction

- Bare copper super finely stranded per DIN VDE 0295 Class 6 or IEC 60228 Class 6
- HGI insulation based on TPE
- Optimized construction for flexing applications
- Conductors cabled with fleece wrap
- Special PVC Jacket per UL class 43 / VDE 0207 TM5
- Oil resistant gray Jacket RAL 7001

Lutze Superflex® N MTW, Unshielded

NEW

High Flexing Control Cable with UL-MTW/CSA/CE Approvals

Application

- Suitable for control, monitoring and instrumentation applications with continuous flexing cycles
- For moderate flexing applications in C-tracks up to 10 meters and other applications where linear flexing occurs
- Compatible with all major brand C-tracks
- Machine Tool Wire (MTW) conforms with NFPA 79 2007 edition**

Characteristics

- Small cable ODs due to special PVC/Nylon insulation compliant with UL 1063
- Very flexible with superfine stranding
- Specially formulated PVC jacket per UL Class 43
- Non-wicking fillers
- Abrasion, high wear and tear resistance
- Hydrolysis, microbe and decompose resistant
- Talc free
- Silicone free
- RoHS compliant
- Dry, damp and wet conditions

Technical Data

Voltage	600V UL MTW
Test voltage	3000 V
Insulation resistance	Min 100 MΩ x km
Temperature	Moving -5 - +90°C Fixed -40 - +90°C
Bending radius	Moving 10 x cable OD Fixed 5 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground
Burning behavior	Flame-retardant per UL VW-1, DIN EN 50265-2-1
Oil resistance	Oil resistant per UL 4D100C and DIN EN 60811-2-1

Construction

- Bare copper super finely stranded per DIN VDE 0295 Class 6 or IEC 60228 Class 6
- PVC/Nylon insulation
- Optimized construction for flexing applications, tested per VDE flexing test.
- Conductors cabled with fleece wrap
- Special PVC Jacket per UL class 43 / VDE 0207 TM5
- Oil resistant gray Jacket RAL 7001

High Flexing Control Cable with UL/TC-ER/CSA/CE Approvals

Application

- Suitable for control, monitoring and instrumentation applications with continuous flexing cycles
- For flexing applications such as C-tracks and other applications where linear flexing occurs
- Compatible with all major brand C-tracks
- Compliant with **NFPA 79** requirements
- TC-ER** for use with cable trays **without conduit**, which can reduce material and labor costs

Characteristics

- Small cable ODs due to special **PVC-Nylon Insulation** compliant with UL
- Compliant with NFPA 79 2007 requirements
- Very flexible with superfine stranding
- Specially formulated Alloy jacket per UL
- Non-wicking fillers
- Abrasion, high wear and tear resistance
- Hydrolysis, microbe and decompose resistant
- Talc free
- RoHS compliant
- Dry and wet conditions

Technical Data

Voltage	600V UL TC, AWM
Test voltage	3000 V
Insulation resistance	Min 100 MΩ x km
Temperature	Moving -15 - +90°C Fixed -25 - +90°C
Bending radius	Moving 7.5 x cable OD Fixed 4 x cable OD
Conductor marking	Black with white numbers and one green/yellow
Burning behavior	Flame-retardant per UL VW-1, UL 1581, FT4
Oil resistance	Oil resistant per UL Oil res I and DIN EN 60811-2-1
Approvals	UL Type TC-ER per UL 1277 C(UL) TC and CIC FT4

Construction

- Bare copper super finely stranded per DIN VDE 0295 Class 6 or IEC 60228 Class 6
- PVC-Nylon Skin insulation
- Optimized construction for flexing applications
- Conductors cabled with fleece wrap
- Special Alloy Jacket per UL
- Oil resistant black Jacket RAL 9005

Lutze Superflex® Plus N PUR, Unshielded

High Flexing Control Cable with UL/CSA/CE Approvals

halogen-free

Application

- Multi-conductor cable for robots, handling equipment, machine tools, C-tracks and applications with extremely rough operating conditions
- For the most demanding flexing applications such as C-tracks and linear flexing
- Compatible with all major brand C-tracks

Characteristics

- Superfine stranding per Class 6 for continuous moving applications
- Extremely small cable ODs due to special **TPE High Glide Insulation** compliant with UL
- Reduced friction
- PUR jacket
- Highest level of resistance against cooling fluids, greases and oils
- Abrasion and hydrolysis resistant, low water absorption
- Dry and wet conditions
- UV resistant
- Non-wicking fillers
- Silicone/Talc free
- RoHS compliant

Technical Data

Voltage	300/600V UL AWM
Temperature	Moving -25°C - +80°C Fixed -40°C - +80°C
Bending radius	Moving 7.5 x cable OD Fixed 4 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground; *no ground included
Isolation resistance	Min 100 MΩ x km
Approvals	UL/CSA/CE Halogen free per DIN EN 50264-1, EN 50267-2-1, EN 60684-2, Flame-retardant per DIN EN 50265-2-1, IEC 60332-1, VW 1, FT 1 RoHS

Construction

- Bare copper super finely stranded per DIN VDE 0295 Class 6 or IEC 60228 Class 6
- TPE conductor insulation
- Extremely oil resistant gray PUR jacket

Lutze Superflex® Plus N PUR 0.6/1kV, Shielded

High Flexing Motor Cable 0.6/1kV, Shielded, Orange

halogen-free

Application

- High flexing Servo Motor, Motor and VFD Cable for C-tracks and applications with extremely rough operating conditions and oil exposure
- Compatible with all major brand C-tracks

Characteristics

- Superfine stranding per Class 6 for continuous moving applications
- TPE conductor insulation
- PUR jacket
- Highest level of resistance against cooling fluids, greases and oils
- Abrasion and hydrolysis resistant, low water absorption
- UV resistant
- Non-wicking fillers
- Silicone/Talc free
- RoHS compliant

Technical Data

Voltage	1000V UL AWM U ₀ /U 0.6/1kV
Temperature	Moving -25°C - +80°C Fixed -40°C - +80°C
Bending radius	Moving 10 x cable OD Fixed 6 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground
Isolation resistance	Min 100MΩ x km
Approvals	UL/CSA/CE UL VW-1; CSA FT1 IEC 60332-1 Halogen free per DIN EN 50264-1, EN 50267-2-1, EN 60684-2, RoHS

Construction

- Bare copper super finely stranded per DIN VDE 0295 Class 6 or IEC 60228 Class 6
- TPE conductor insulation
- Tinned copper braid shield
- Extremely oil resistant orange PUR jacket

Part No.	Description No. of conductors incl. ground	OD - Ø ca. mm	OD - Ø inches	Weight Lbs/Mft	Copper Lbs/Mft

Lutze Superflex® PUR 0.6/1kV, Unshielded

High Flexing Single Conductor Motor Cable 0.6/1kV, Unshielded

halogen-free

Application

- Performance flexing cable, specifically suitable for machine and device construction for transport and conveyor technology
- As motor supply or ground conductor
- Optimally suited for C-tracks in extremely harsh operating conditions
- Compatible with all major brand C-tracks

Characteristics

- Flame-retardant, self-extinguishing
- Very good alternating bending strength
- Good pressure and roll-over resistance
- Superfine stranding per Class 6 for continuous moving applications
- TPE insulation with very high break through resistance
- PUR jacket for highest level of resistance against cooling fluids, greases and oils
- Abrasion and hydrolysis resistant, low water absorption
- UV resistant
- Silicone/Talc free
- RoHS compliant

Technical Data

Voltage	U ₀ /U 0.6/1kV
Test voltage	4000V
Temperature	Moving -25°C - +80°C Fixed -40°C - +80°C
Bending radius	Moving 7.5 x cable OD Fixed 4 x cable OD
Isolation resistance	Min 20MΩ x km
Approvals	UL/CSA/CE UL VW-1; CSA FT1 IEC 60332-1 RoHS

Construction

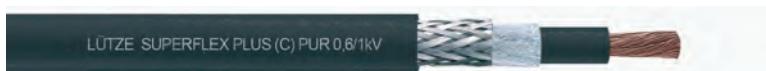

- Bare copper super finely stranded per DIN VDE 0295 class 6 or IEC 60228 class 6
- TPE insulation
- Extremely oil resistant black PUR jacket

Construction

- Bare copper super finely stranded per DIN VDE 0295 Class 6 or IEC 60228 Class 6
- TPE insulation
- Tinned copper braid shield
- Extremely oil resistant black PUR jacket

Lutze Superflex® Plus (C) PUR 0.6/1kV, Shielded

High Flexing Composite Motor Cable with UL/CSA/CE/DESINA Approvals

halogen-free

Application

- High flexing multi-conductor cable for VFD and Motor applications with one or two control pairs such as Siemens and Indramat
- Designed for demanding C-track applications
- Compatible with all major brand C-tracks

Characteristics

- Superfine stranding per Class 6 for continuous moving applications
- TPE conductor insulation
- Reduced friction
- PUR jacket
- Low capacitance
- Highest level of resistance against cooling fluids, greases and oils
- Abrasion and hydrolysis resistant, low water absorption
- UV resistant
- Non-wicking fillers
- Silicone/Talc free
- RoHS compliant

Technical Data

Voltage	1000V UL AWM U ₀ /U 0.6/1kV

Lutze Superflex® Plus (C) PUR Kombi (Encoder), Shielded

High Flexing Composite Encoder Cable with UL/CSA/CE/DESINA Approvals

halogen-free

RoHS DESINA

Application

- High flexing composite cable for continuous moving encoder applications, gantry robots, machine tools and plant construction
- Designed for demanding C-track applications
- Compatible with all major brand C-tracks

Characteristics

- Superfine stranding per Class 6 for continuous moving applications
- PUR jacket TPE conductor insulation for use in extremely harsh operating conditions
- Low capacitance
- Highest level of resistance against cooling fluids, greases and oils
- Abrasion and hydrolysis resistant, low water absorption
- UV resistant
- Non-wicking fillers
- Silicone/Talc free
- RoHS compliant

Technical Data

Voltage	300V UL AWM
Temperature	Moving -25°C - +80°C Fixed -40°C - +80°C
Bending radius	Moving 12 x cable OD Fixed 6 x cable OD
Conductor marking	DIN 47100 if not specified
Approvals	UL/CSA/CE UL VW-1; CSA FT1 IEC 60332-1 Halogen free per DIN EN 50264-1, EN 50267-2-1, EN 60684-2, RoHS

Construction

- Bare copper super finely stranded per DIN VDE 0295 Class 6 or IEC 60228 Class 6
- TPE insulation
- Tinned copper braid shield
- Extremely oil resistant orange or green PUR jacket

	Fixed	6 x cable OD
Approvals	UL/CSA/CE	
	UL VW-1; CSA FT1	
	IEC 60332-1	
	Halogen free per DIN EN 50264-1, EN 50267-2-1, EN 60684-2	
	RoHS	

Construction

- Flexible superfine wire stranding
- Polyethylene (PE) conductor insulation
- Tinned copper braid shield
- Extremely oil resistant PUR jacket

Part No.	Description No. of conductors	OD - Ø ca. mm	OD - Ø inches	Weight Lbs/Mft
----------	----------------------------------	------------------	------------------	-------------------

Profibus

Impedance: 150 Ω ± 15% ; Mutual capacitance: <30 pF/m

104265	(1x2x0.64 Ø) (1 pair AWG 24) RD, GN	8.0	0.315	37

Lutze Superflex® Ethernet Network Cable (C) PUR, Shielded

High Flexing Ethernet Network Cable with UL/CSA/CE Approvals

halogen-free

CE DESINA RoHS

Application

- High flexing industrial field network cable for fast ETHERNET applications
- Designed for demanding C-track applications
- Compatible with all major brand C-tracks

Characteristics

- Shielded for optimal data integrity in industrial environments
- Silicone/Talc free
- RoHS compliant

Technical Data

Impedance	100 Ω +/- 10% (1-100 MHz)
Loop Resistance	
AWG22/7	<110 Ω/km
AWG23/19	<130 Ω/km
AWG24/19	<155 Ω/km
AWG26/19	<280 Ω/km
Operating capacitance	< 50 pF/m
Nominal Voltage	250V
Test Voltage	1500V
Temperature	
Moving fixed	-25°C - +80°C -40°C - +80°C
Bending radius	
Fixed	6 x cable OD
Moving	12 x cable OD
Approvals	UL/CSA AWM CE UL VW-1; CSA FT1 IEC 60332-1 RoHS

Lutze TOP-T Fittings Reducer and Enlarger

Plastic Metric Reducer and Pg Reducer

Plastic Pg Enlarger

Metric Reducer Characteristics:

- Reduction of threaded or clearance holes to smaller thread size
- Temperature range -30°C - +100°C / -22°F - +212°F
- Material Polyamide PA6 GF30
- Internal/External thread Metric as per EN 60423
- Color Gray RAL 7035

Pg Reducer Characteristics:

- Reduction of threaded or clearance holes to smaller thread size
- Temperature range -30°C - +100°C / -22°F - +212°F
- Material Polyamide PA6 GF30
- Internal/External thread Pg as per DIN 40430
- Color Gray RAL 7035

Pg Enlarger Characteristics:

- Enlarger of threaded or clearance holes to larger thread size
- Fiber glass reinforced
- Temperature range -30°C - +100°C / -22°F - +212°F
- Material Polyamide PA6 GF30
- Internal/External thread Pg as per DIN 40430
- Color Gray RAL 7035

Lutze TOP-T Locknuts Plastic

Plastic NPT, Pg and Metric

Characteristics:

- Hexagonal locknut for secure tightening of plastic cable fittings and accessories
- Easy to install
- Temperature range -30°C - +80°C / -22°F - +176°F
- Max temporary temperature up to +150°C/+300°F

Locknut Specifications:

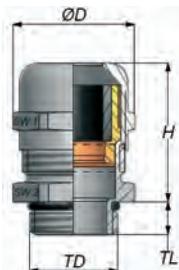

Material	Polyamide 6, 30% glass fiber reinforced
Color	Black RAL 9005 Gray RAL 7001

Please note the following specification change:
Locknuts with Flange design starting Spring 2010.
Flange is imprinted with locknut size for easy identification.

Lutze TOP-T Fittings Metric

Metal Metric

Characteristics:

- Integrated strain relief
- Anti-twist design
- Wide sealing and clamping range
- Easy to install
- Temperature range -40°C - +100°C / -40°F - +212°F
- Protection class IP68

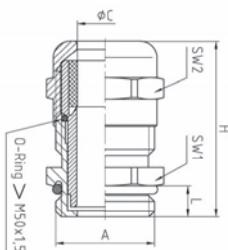

Fitting Specifications:

Connecting thread	Metric as per EN 60423
Material	Brass, nickel plated
Clamping insert	Polyamide 6
Sealing ring	Neoprene
O-ring	NBR

Lutze TOP-T Fittings Metric EMC V

Metal Metric EMC V (Electro Magnetic Compatibility), Quick Installation, Vibration Proof

Characteristics:

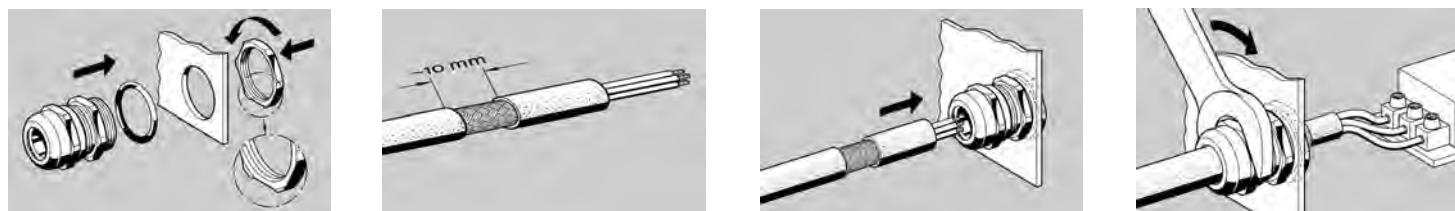

- Adapts to different size cable shields
- 360° shield termination
- Integrated strain relief
- Wide sealing and clamping range
- Easy insertion of the cable from either side of the fitting
- Easy installation without any damage to the cable braid thanks to rotating contact fingers
- Large contact surfaces allow for low contact resistance even on loosely woven cable braids as the contact surfaces do not push in between the braid wires.
- Proper shield contact guaranteed even in applications with vibration, e.g., wind turbine and transportation.
- Temperature range -40°C - +100°C / -40°F - +212°F
- Protection class IP68

Lutze TOP-T Fittings Accessories

Multihole Insert TPE Pg, Metric, NPT

Characteristics:

- Multiple hole insert for two or more cables in one fitting
- Replaces the existing rubber insert to offer multiple hole installation
- Suitable for plastic and metal fittings
- Solid inserts can be drilled to suit any application
- Minimum quantity 100 pcs/package

Lutze Fittings Cablefix

Cablefix

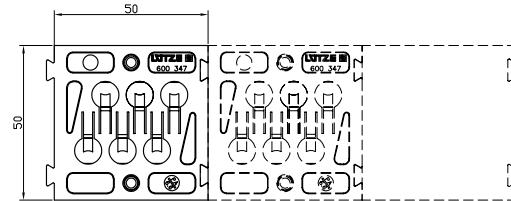

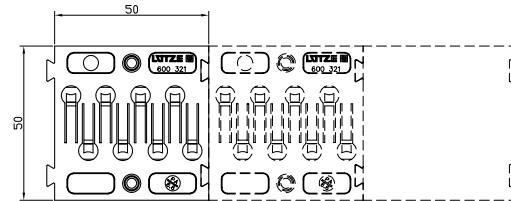

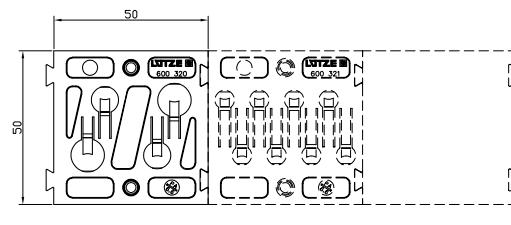

Characteristics:

- Integrated strain relief in one direction
- Easy to install: cable pushes easily into position, locks itself and it can no longer be pulled out unless the clamp is released
- An integrated seal protects up to IP55
- Individual cables can be easily loosened and replaced for troubleshooting, maintenance or retrofiting
- Mix & Match: interlocking seal allows for any combination of the three different cablefix versions to custom fit it to your application
- Blanking plugs are supplied to seal unused holes

Fitting Specifications:

Material	Polyamide PA
Temperature range	-30°C - +70°C / 22°F - +212°F
Halogen-free	Yes
Burning behavior	Polyamide plate according to UL 94 V2
Silicone free	Yes
Enclosure wall thickness	maximum 3 mm
Protection class	IP55
Seal	NBR60 oil resistant

Lutze Cablefix Vario

Assembly of Modular Strain Relief System

1. Choose aluminum or plastic frame.

The Cablefix Vario features outstanding material characteristics for harsh industrial environments and a high sealing protection of IP65. Every frame ships with an included drill pattern for proper mounting to the cabinet.

The plastic frames are made of reinforced polyamide 66 with brass support. The aluminum version is made entirely of solid polished aluminum.

Cablefix Vario offers strain relief options for cable ranges from 4.5 to 34.5 mm in diameter. The versatile system is ideal for installations and retrofitting, and offers proper strain relief for already connectorized cables. This is a great advantage over conventional solutions with standard cable fittings.

2. Choose appropriate inserts for the selected frame.

Example:

606050 can hold either

- 4 inserts type VK or
- 2 inserts type VG
- 2 VK inserts replace 1 VG insert

VK small	VK small	VG large	VG large	VG large	VK small
VK small	VK small				VK small

- The tongue and groove design makes combining different inserts quick and easy.
- The slotted design allows easy installation by sliding the assembled cables in from the side.

3. Select appropriately sized blanking plugs for unused holes.

Once all unused holes are plugged, the system provides a protection rating IP65. The rubber components do not require the use of grease, which is advantageous over other similar systems.

The advantages at a glance:

- Minimum space requirement
- Simple insertion of rubber inserts due to tongue and groove design
- Very versatile
- Allows future expansion
- Ideal for retrofitting of existing cabinets

Lutze Network Connectivity Products

Industrial Network Connector, Patch Box and Receptacle Connector

Application

- Industrial Ethernet connectivity

Characteristics

- Ethernet connector for industrial environments
- Profinet compatible category 5 style connector
- Office Ethernet compatible
- Shield termination
- Field mounting capability

Technical Data

Temperature	-40°C - +70°C
Overall length	52.6 mm / 2.07 inches
Fits cable ODs	6.1 to 6.9 mm / 0.24 to 0.27 inches

Industrial Connector

Part No.	Description	IP Class	Connector	Color
722100	Qualified for field bus system Profinet, SERCOS 3, Ethercat Ethernet/IP, Powerlink, VARAN	20	RJ45-M 8 pol. Cat.5e	black
722101	Qualified for field bus system Profinet, SERCOS 3, Ethercat Ethernet/IP, Powerlink, VARAN	20	RJ45-M 4 pol. Cat.5e Profinet	black

Application

- Industrial Ethernet connectivity

Characteristics

- RJ45 pass through
- Category 5e
- Gold-plated 8 data pin connection
- Attached plastic cap

Technical Data

Temperature	-25°C - +70°C
IP Rating	IP65 closed, IP20 connected
Dimensions (DxD)	29.5 mm x 29 mm

RJ45 Receptacle Connector for front mounting 22.5 mm

Part No.	Description	IP Class	Connector	Color
491075	Receptacle Connector	65 (closed) 20 (connected)	RJ45 F/F 8/8 Cat.6	gray
492075	Receptacle Connector	65 (closed) 20 (connected)	RJ45 F/F 8/8 Cat.5e	gray

*All values given are calculated based on NEC 310.16 and are de-rated. For actual amperage consult your Motor/Drive manual and your local code restrictions. This guideline is simplified in order to select cable sizes. This document has no legal meaning, the interpretation of the NEC code has to be verified by the Authority Having Jurisdiction (AHJ).

Lutze Technical Overview

Lutze VFD and Motor Cable improved with Semi-Conductive Layer

A Variable-Frequency Drive (VFD) is a device designed for alteration of a motor's rotational speed by changing the frequency and the voltage of the electrical power supplied to it. In this manner, the rotational speed can be adjusted within a wide range from standstill to above the nominal rotation speed at 60 hertz.

The second main feature of a VFD is that it offers motor torque control. To avoid overload of the motor the torque has to decrease when running the motor at higher speeds and vice versa. In VFD applications the constant frequency of 60 hertz in a sinusoidal waveform is altered into a variable frequency as shown in the illustration.

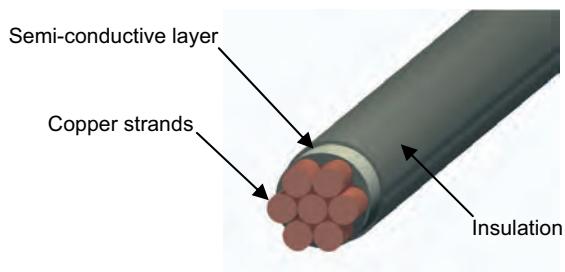

The use of VFD technology poses high demands on the cable connecting the motor to the drive. Standard motor cable for fixed-speed operation does not meet the requirements of VFD applications, thus causing operating malfunctions and may result in premature cable failure.

High switching frequencies and harmonic waves cause high capacitive charging current and overvoltage spike problems within the cable that connects the drive to the motor. These problems put tremendous stress on VFD cables and the stress even increases further the longer the distance between drive and motor. Another stress factor is called "corona discharge effect".

Standard insulated conductors have very small gaps between the conductor and its insulation material caused by the irregular surface of stranded conductors. This can lead into an uncontrolled corona discharge across these gaps and break down the insulation over time. This problem is well known in medium voltage applications.

VFD applications can cause spikes up to 2000V, close to medium voltage applications. A way to improve the durability of the insulation is to extrude a layer of semi-conductive material over the stranded conductor to smoothen out the surface and get a perfectly cylindrical shaped conductor. Then the insulation is applied over the smooth surface to avoid air gaps altogether.

Lutze is now using this technology and provides you with a better and more durable cable for your VFD and motor applications while maintaining one of the most flexible and round cables in the marketplace. Our existing Motor & Drive cable A116 and A117 series is being updated with a semi-conductive layer and we started transitioning to the new design with production in May 2009. Please refer to the overview of the specification improvements.

Lutze Technical Overview

NFPA 79, 2007 Edition

NFPA 79 is the electrical standard for Industrial Machinery in the USA. A number of significant updates were implemented in the 2007 edition. The NFPA 79 is a code published by the National Fire Protection Agency, the same Agency that publishes the National Electric Code (a.k.a. NEC or NFPA 70) every three years.

The NFPA 79 has special provisions addressing safe wiring practices for industrial machinery such as machine tools. Chapter 12 of the NFPA 79 addresses cables and cords for use with industrial machinery.

Article 12.2.7.3 enforces a significant change as it specifically prohibits the use of AWM (Appliance Wiring Material) style cable “unless it is part of a listed assembly”.

NFPA 79 requires listed types to be used. These cables carry a NRTL listed logo such as the “UL listed” logo. It should be noted that cables can have dual- or multi ratings and carry both marks, UL recognized and UL listed along with other marks, the listing will prevail.

Permitted:

Appliance Wiring Material is regulated by UL 758 and carry the recognized logo:

Not permitted:

UL recognized cable is not permitted for field wiring per the NFPA 79 – 2007 edition unless it is part of a listed assembly.

In most cases the AHJ (Authority Having Jurisdiction) decides whether or not the NFPA 79 applies. The AHJ usually is the organization or individual that approves the equipment and can be the owner/operator of equipment, the insurance company or the inspector itself. The NFPA 79 is not a law but a standard which can be written into law by each state. At the moment the state of Ohio has written the NFPA 2007 edition into its state law. Six other states are investigating to implement this new standard as well. When it is written into law the compliance with NFPA 79 is no longer an option: it is mandatory.

Lutze offers listed types with MTW, TC-ER, PLTC and CM marks. Cables with these markings are considered listed types and are permitted to be used in NFPA 79 compliant applications.

M50x1.5	8.0	20
M63x1.5	9.0	20

The specified values are recommended for achieving the protection class IP68 at 5 bar. Please choose the suitable torque for the material and cable application. The actual crush resistance of each cable must be considered. The values shown are for reference only.

Lutze Technical Overview

Protection Class Designation according to EN 60529

The protection of electrical equipment through corresponding enclosure is specified with code letters and code numbers. This protection class designation consists of the letters "IP" and two code numbers from 0 to 8. The first code number stands for the protection against contact and foreign substances, the second number specifies the degree of protection against water. The higher the respective code number is, the higher the offered protection. The protection class for each product is specified in the respective technical information.

For example:

IP 65	Code letter IP	IP	
	First code number	6	corresponds to: Protection against entrance of dust
	Second code number	5	corresponds to: Protection against sprayed water

For protection against contact and foreign substances

First code number	Protection scope designation	Explanation
0	No protection	No special protection of persons from accidental contact with standing or moving parts under voltage. No protection of the equipment against entry of solid foreign substances.
1	1 Protection against foreign substances > 50 mm	Protection against accidental contact of large area surfaces of standing and internally moving parts under voltage, e.g. with the hand, but no protection against intentional access to these parts. Protection against entry of solid foreign substances with a diameter larger than 50 mm.
2	Protection against foreign substances > 12 mm voltage	Protection against contact by the fingers of standing or internally moving parts under voltage. Protection against entry of solid foreign substances with a diameter larger than 12 mm.
3	Protection against foreign substances > 2.5 mm tools	Protection against contact of standing or internally moving parts under voltage with, wires or similar of a thickness larger than 2.5 mm. Protection against entry of solid foreign substances with a diameter larger than 2.5 mm.
4	Protection against foreign substances > 1 mm	Protection against contact of standing or internally moving parts under voltage with tools, wires or similar of a thickness larger than 1 mm. Protection against entry of solid foreign substances with a diameter larger than 1 mm.
5	Protection against dust accumulation	Full protection against contact of standing or internally moving parts under voltage moving parts under voltage. Protection against dust accumulation. The entry of dust is not fully prevented but the dust may not enter in such quantities that the functioning is impaired.
6	Protection against dust accumulation	Full protection against contact of standing or internally moving parts under voltage moving parts under voltage. Protection against entry of dust.

For water protection

Second code number	Protection scope designation	Explanation
0	No protection	No special protection.
1	Protection against vertically falling dripping water	Water drops that fall vertically may not have any damaging effect.
2	Protection against dripping water falling at an angle	Water drops that fall at an arbitrary angle of up to 15° to vertical may not have any damaging effect.
3	Protection against sprayed water	Water that falls in an arbitrary angle up to 60° to vertical may not have a damaging effect.
4	Protection against splashed water	Water that is splashed from all directions against the equipment may not have a damaging effect.
5	Protection against water projected from a nozzle	Water projected from a nozzle that is aimed at the equipment from all directions may not have any damaging effect.
6	Protection against flooding	Water may not enter into the equipment in damaging amounts during temporary flooding (e.g. by heavy seas)
7	Protection against immersion	Water may not enter in damaging amounts if the equipment is immersed in water for the defined pressure and time conditions.
8	Protection against submersion	Water may not enter in damaging amounts if the equipment is submerged in water for the defined pressure and indefinite amount of time.

New Product - New Solution!

Lutze Thermoflex Solar UL

- Photovoltaic wire listed per UL 4703 and designed for photovoltaic panel wiring
- Designed to meet new North American electrical code requirements per NEC 2008 edition.
- Very flexible, therefore easy to install
- Insulation and jacket is easily removable
- RoHS & REACH compliant

Part No.	Conductor Size
A11401	AWG 14
A11201	AWG 12
A11001	AWG 10
A10801	AWG 8
A10601	AWG 6
A10401	AWG 4
A10201	AWG 2

LUTZE 
Systematic Technology

Lutze Product Overview

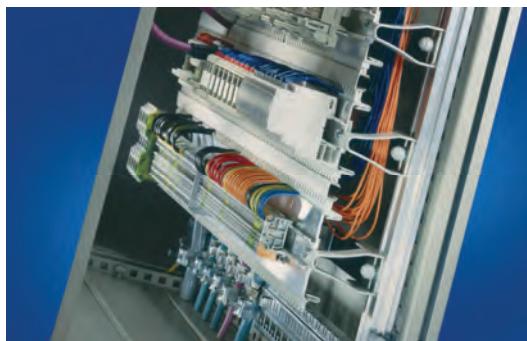

Cable Solutions

Flexible and continuous flexing cables for machine control and power distribution applications. Wire management for industrial automation.

Cabinet Solutions

Lutze LSC Wiring System saves space, time and cost. LSC is an aluminum frame that replaces the traditional back panel and wire duct for mounting and wiring of electrical components in a control enclosure. LSC shortens wiring times and improves heat dissipation.

Automation Solutions

Lutze offers din rail mountable compact power supplies, industrial Ethernet switches, and intelligent circuit protection with the Lutze LOCC-Box.

Transportation Solutions

Lutze supplies high-tech electronic modules for railway applications. Lutze control modules are proven to be long lasting and highly reliable in applications with extended temperature range, vibration and other harsh external influences.
