

Perimaliter® Wallpacks

Perimaliter III PVL3 / PGM3 • Perimaliter II PGL

Solutions for Perimeter/Area Lighting

Perimaliter® Wallpacks

The Perimaliter wallpack has been the design leader in refractor wallpacks for the past 20 years. The construction, optical characteristics and quality manufacture make the Hubbell Perimaliter the most desired refractor solution for perimeter/area lighting from a wall mount. Perimaliter III PVL3 and PGM3 features:

Energy-Saving LED

- LED units provide 60-70% energy savings over traditional wallpack systems producing 60LPW (lumens per watt)
- PVL3 LED and PGM3 LED uses only 69w (700mA)
- Lateral spread allows typical spacing of three to four times mounting height with excellent uniformity
- PGM Produces over 4100 lumens out of the fixture at nominal 5000K with asymmetric distribution for typical mounting heights of 10-15 feet
- Available in 4000K and 5000K color temperature

Wire Access

- UL required 1.75" minimum back opening for wiring access and inspection
- Side 1/2" hubs for feed thru surface conduit
- Top 1/2" hub for conduit or button photo control

Refractor Selection

- Vandal resistant polycarbonate (PVL)
- Borosilicate glass (PGL)

Perimaliter® III PVL3

69-150w

Vandal Resistant – High Performance Wallpack

Refractor/Door Assembly

- One-piece injection molded UV stabilized polycarbonate
- Sharp prism design – Distributes lumens at exact angles, engineered for spacings up to 6 times mounting height
- Dark Bronze finish is painted on inside of door so projectile impacts will not mar the appearance
- Four point door compression provides seal against moisture and insects, certified for wet locations
- HubbellGard™ fasteners have external coating to prevent chemical interaction in the cast aluminum housing, allows easy service and eliminates screw "Freezing" or "Bonding"
- New improved bottom hinges have been strengthened for durability and years of maintenance-free operation
- 150w pulse start max/ medium base lamp (increases lamp to lens distance) - PVL3 reduces lens UV and heat exposure for longer life

LED System

A thirty LED light engine produces over 4100 lumens at 5000K with asymmetric distribution. Optional 10KA surge protection available as an option.

Polycarbonate Refractor

One-piece front, impact resistant, sharp prism performance.

Heavy Duty Hinges

NEW – Two-piece hinge design provides increased strength – resists shipping/installation/maintenance damage.

1/2" Conduit Hubs

1/2" tapped hubs with gasketed plug. PVL3 and PGM3 feature two side hubs and one top hub for superior access.

Lighting Distribution

- Vertical HID lamp reduces “Hot spot” beneath fixture and provides more lateral lumens for better uniformity
- Wide lateral spacing allows less fixtures to be installed or provides greater light levels and uniformity from closer mounting locations

Results

- Vertical illumination fills application space, increasing pedestrian perception of safety and security
- Eliminates dark walls and “hiding” places

Certified

- Listed to UL1598 for use in wet locations

69-250w

Perimaliter® III PGM3

Glass Refractor Wallpack for Wide Spacing Applications

Refractor/Door Assembly

- Borosilicate glass refractor, non-yellowing
- Energy-saving 69w LED and HID systems up to 250w
- Engineered for spacings up to 6 times mounting heights
- Glass is silicone sealed to die-cast aluminum door
- 800 series polyester powder paint provides rugged, lasting appearance; Multiple finish selections available
- Four point door compression closure provides seal against moisture and insects, certified for wet locations
- HubbellGard™ fasteners have external coating to prevent chemical interaction on the cast aluminum housing, allows easy service while eliminating screw “Freezing” or “Bonding”
- Robust bottom hinges for durability and years of maintenance free operation

Button Photo Control Accessory

Top hub makes PBT Photo control installation easy.

Secure Mounting

Two back knockouts 9" on center for rigid installation. 1.75" rear wire access with grommet.

Borosilicate Glass Refractor

Heat resistant, non-yellowing prism design for wide spacing.

Ballast Assembly (HID only)

Identification and electrical data clearly presented on ballast cover inside fixture door. Medium base-up socket provides maximum light output, life and uniformity.

EM Bayonet Socket (HID only)

EM – EM option, a separate double contact bayonet socket for use with back up generators (By others.) (Lamp not included)

QSS – EM socket above plus transfer relay. Senses a lamp that will not re-strike, triggers power to EM socket.

Large application PGL, heavy-duty rugged design. Powered by Pulse-Start for energy savings

The **PGL** family provides higher wattage systems for typical mounting heights of 20-30 feet. This series has many of the same features as the smaller Perimaliter III series and shares the same door and borosilicate glass refractor with the **PGM3**. The housing is nearly 2" deeper to accommodate the higher wattage ballast systems.

Wiring Access

The **PGL** has the same 1/2" wiring hubs on each side but the PBT button photo control hub is located on the left side (as you face the unit).

Optics

All sockets are vertical, mogul base.

Systems

PGL is available in 250w and 350w PSMH and 250w and 400w HPS.

Options

EM Egress option – A separate double contact bayonet socket for use with back up generators. These systems allow some level of light during power failures as soon as a building's generator begins to operate.

QSS Standby option- senses if the main lamp is operating when power is available. After a momentary voltage dip, many HID lamps will go off and will not immediately re-strike. This relay switches the power to a DC bayonet socket to power up to a 250w quartz lamp (not included). When the main lamp does strike, the **QSS** system automatically shuts down.

Typical Photometrics – 150 PSMH at 15 feet

Vertical Lamp Perimaliter® – Wide lateral spacings 6 times mounting height for 1 FC minimum between fixtures

Horizontal Lamp Wallpack – Mostly forward throw 4 times mounting height spacing for 1FC minimum between fixtures

69-150w

Perimaliter® III PVL3

- One-piece removable polycarbonate lens/door assembly, internally painted for lasting appearance
- 6-to-1 spacing to mounting height ratio; Two HubbellGard® fasteners provide weathertight seal to housing
- Die-cast aluminum housing for rugged mounting and heat dissipation; 1/2" feed-thru hubs and top photo control hub provided for field installations; standard mount over recessed wiring boxes
- Specular reflector, vertical lamp and refractor combine for efficient and uniform perimeter lighting
- Energy-saving 69w LED and HID systems up to 150w (50hz ballastry available)
- For HID socket is porcelain medium base with spring-loaded center contact
- Accessories: Photo controls/ Full cut-off visors
- Listed to UL 1598 for use in wet locations

14 7/8"	15"	8"	7 7/16"
(378 mm)	(381 mm)	(203 mm)	(189 mm)

Replacement Parts

- 200-0180-9904 Polycarbonate front
- 800-3399-0104 Aluminum/Glass front, Bronze

Notes

- L - Indicates lamp included with the fixture
- Above units (-18) are Quad Tap (120,208,240,277V). 480V available on 150w units change 8 to 5
- For Tri Tap Canadian ballast (120,277,347V) change 8 to 6
- All units are provided in BZ - Dark Bronze finish
- 50HZ ballastry is available - Consult factory

Perimaliter® III PGM3

69-250w

- Cast aluminum removable door with borosilicate glass refractor; Twin HubbellGard™ screw closure for positive seal
- Cast aluminum back housing provides firm mounting and heat dissipation; Mounts over recessed wiring boxes; Two 1/2" conduit hubs for feed-thru wiring and top hub for field installation of photo control
- Specular aluminum reflector, vertical lamp and refractor prisms combine for excellent perimeter lighting, provides 5-6 times spacing
- Energy-saving 69w LED light engine
- For HID socket is porcelain medium base with spring-loaded center contact for all offerings below 250w, 250w units are mogul base
- Bronze powder standard paint finish, consult factory for other finishes available
- Listed to UL 1598 for use in wet locations
