## **Construction:**

- The die-cast aluminum housing provides firm mounting over recessed junction boxes ½" side hubs included for surface conduit wiring. Housing includes a top hub for use with button photo controls for dusk-to-dawn control. The construction not only provides a rigid mount but an excellent heat sink for the LED system, allowing proper operating temperature for optimum performance and long life (50,000hr)
- Two door options are available: A cast aluminum and prismatic borosilicate glass assembly for typical commercial applications and an all polycarbonate, one-piece, vandal resistant door for use in non-supervised locations
- Standard finish is dark bronze textured powder paint. The PGM3 version is available in alternate finishes of black, white, gray and platinum silver
- A 4000K light engine is available for applications desiring a warmer appearance, output reduced by 8-10%

# Optics/Electrical LED:

- Drivers are 120-277V universal voltage 50/60Hz and have dimming capability standard. Drivers and light engine are easily accessible for future servicing
- A thirty LED light engine produces over 4100 lumens out of the PGM3 (3500 lumens for PVL3) at nominal 5000K with asymmetric distribution for typical mounting heights of 10-15 feet. The lateral spread allows typical spacing of three to four times the mounting height with excellent uniformity. The light engine is driven at 700ma and only uses 69 input watts for high 60LPW efficiency.
