

elertus Water Leak Detector

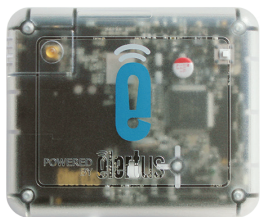

Water Sensor Guide

Installing the Water Sensor

The Elertus Water Sensor Accessory

1 Place the Elertus Smart Sensor near enough to the area you will be monitoring for water leaks so the Water Sensor Accessory can easily lay flat on the surface to be monitored.

The Elertus Smart Sensor

The Water Sensor Accessory can detect water at as little as 1/16th of an inch deep.

The Water Sensor Accessory has two pre-drilled holes so you can optionally secure the Accessory to the surface with screws.

3 Place the Elertus Water Sensor Accessory on a surface you want to monitor with the Elertus "e" facing up.

This side needs to face up.

Push the sensor plug into the accessory jack until you hear a "click."

2 Plug the water sensor into the accessory jack on the side of the Elertus Smart Sensor.

4 Now all you need to do is select "Water Sensor" in the Elertus smartphone app **or** website.

A To select the "Water Sensor" on the smartphone app, open up the app and press the gear icon  at the bottom-right of the screen.

Make sure you select the correct Elertus Smart Sensor from the menu at the top of the page.

Swipe to the bottom of the page and tap on the "Wired Sensor Type" menu. Tap on "Water Sensor" and then tap the **OK** button.

Don't forget to tap the **Save** button.

OR

B To select the "Water Sensor" on the website, open your browser and go to: **controlcenter.elertus.com**.

Sign in to your account and then click "Configure" in the top menu bar.

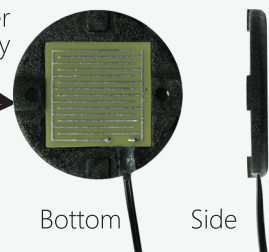

On the Configure page, locate the "Wired Sensor Type" drop-down menu for the Elertus Smart Sensor you are configuring and select "Water Sensor" from the list.

Don't forget to click the **Save Changes** button.

Protect Your Whole Home from Costly Water Damage

The Elertus Water Leak Detector is ideal in any area where leaks are a risk:

In the laundry room

Under the dishwasher

In bathrooms

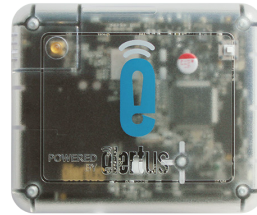

Below water heaters

And don't forget crawl spaces, sump pumps and water softeners, just to mention a few.

There are so many things you can monitor with Elertus

Elertus Smart Sensor

We also sell a version of Elertus that comes with an external door sensor. In addition to monitoring temperature, humidity, movement and light it works great for monitoring shed doors, wine coolers, cabinets and more. Start getting more peace of mind with Elertus.

Frozen Pipes

With the built-in temperature sensor, Elertus can alert you when pipes are at risk of freezing.

Property

Whether you want to keep an eye on a second home or cabin, or monitor your house, apartment, or condo while you're away, Elertus can help.

Pets

Pets are an important part of many households, and the Elertus Smart

Sensor can help you make sure they are well taken care of. Monitor doghouses, kennels, cages, terrariums and with the available wet/dry temperature probe (sold separately) even aquariums.

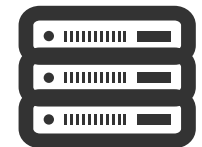

Sheds

Your valuable outdoor equipment is stored in sheds, they are often minimally secured. Make sure your important things are secure and protected.

Server Rooms

Whether you run a whole server room—or just a small server rack—Elertus is a comprehensive, yet affordable solution for monitoring your servers.

Wine Cellars

Is wine woven into your lifestyle, or do you just enjoy a glass during dinner? Either way, Elertus can help keep your wine collection safe and in prime condition.
