PRODUCT INFORMATION

Please take a moment to fill out the information below in order to aid us with any future sales or service inquiries. Model number and serial number information can be found on the serial tag located inside the control box and/or on the lower exterior of the can. Key number can be found on the tag that comes attached to the keys. There may be more than one key number depending on unit.

Please keep this information with your records.

PRODUCT DIMENSIONS

PICTURED WITH OPTIONAL
8819 STAND.

Specifications

120 Volt models

<u>Unit specifications:</u>	11000 Shampoo, 12000 Shampoo & Fragrance, 13000 Fragrance, 16000 Tire Shine
Voltage:	120vac, 60hz
Amperage:	(1) 10 amp service is required for this unit
Compressor:	1/12 HP, 120vac, 60hz, 10A fuse
Peristaltic pump:	Peristaltic pumps, 12VDC
Weight:	150 lbs packaged

Fluid specifications

Shampoo & Spot Remover - 1 gallon each*, dispenses 2.5 gallons of foam per minute or 1 oz of fluid per minute.

Fragrance – 1 gallon of each*, dispenses ¾ oz. in 30 seconds.

Tire Shine – 1 gallon container, dispenses ¾ oz. in 30 seconds.

* Due to space constraints, 12000 combo machine has ½ gallon dispensing jugs inside of cabinet.

220 Volt models

<u>Unit specifications:</u>	11000-220V Shamp, 12000-220V Shamp & Frag, 13000-220V Frag, 16000-220V Tire Shine
Voltage:	220vac, 50hz
Amperage:	(1) 6 amp service is required for this unit
Compressor:	1/12 HP, 220vac, 50hz, 10A fuse
Peristaltic pump:	Peristaltic pumps, 12VDC
Weight:	150 lbs packaged

NOTE: “UNIT INTENDED FOR COMMERCIAL USE ONLY”

IMPORTANT SAFETY INSTRUCTIONS

When using an electrical appliance, basic precautions should always be followed, including the following:

READ ALL INSTRUCTIONS BEFORE USING (THIS APPLIANCE)

WARNING – To reduce the risk of fire, electric shock, or injury:

- Use only as described in manual. Use only manufactures recommended attachments.
- Do not allow to be used as a toy. Close attention is necessary when used by or near children.
- Do not put any object into openings. Do not use with any opening blocked; keep free of dirt and anything that may reduce flow.
- Keep hair, loose clothing, fingers, and all parts of body away from openings and moving parts.
- Do not use near flammable or combustible liquids, such as gasoline, or use in areas where they may be present.
- Do not use near anything that is burning or smoking, such as cigarettes, matches, or hot ashes.
- Do not spray of the chemicals on dashboard, instrument area, consoles, door panels, etc. Decorative trim pieces such as these can become damaged from contact with chemicals.

SAVE THESE INSTRUCTIONS

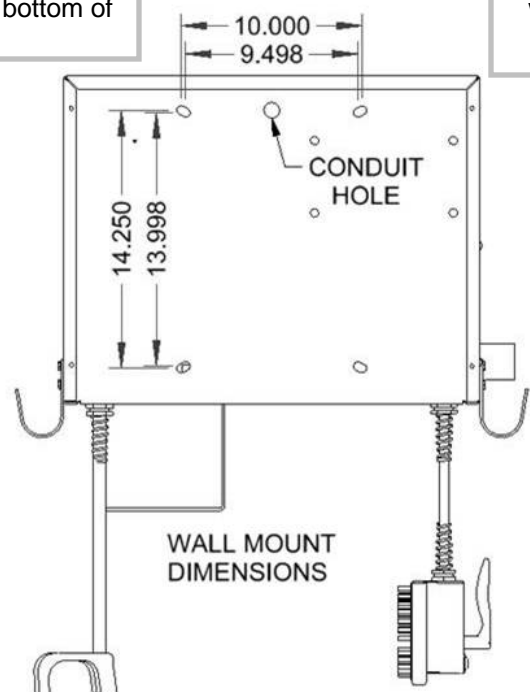

- **Installation Instructions:**
- Determine location to mount unit (“**DANGER**” “**THIS EQUIPMENT INCORPORATES PARTS SUCH AS SWITCHES, MOTORS, OR THE LIKE THAT TEND TO PRODUCE ARCS OR SPARKS THAT CAN CAUSE AN EXPLOSION. WHEN LOCATED IN GASOLINE-DISPENSING AND SERVICE STATIONS INSTALL AND USE AT LEAST 20 FEET (6 M) HORIZONTALLY FROM THE EXTERIOR ENCLOSURE OF ANY DISPENSING PUMP AND AT LEAST 18 INCHES (450 MM) ABOVE A DRIVEWAY OR GROUND LEVEL.**”
- Run electrical service to that location (*NOTE UNIT HAS WIRE PROVIDED UNDERNEATH TO CONNECT INCOMING POWER SUPPLY*)
- **Grounding Instructions:** This appliance must be connected to a grounded metal, permanent wiring system; or an equipment-grounding conductor must be run with the circuit conductors and connected to the equipment-grounding terminal or lead on the appliance.
- All local and national electric codes must be followed for installation and use.
- Licensed electricians are recommended for installation.

Installation:

Power into cabinet can run through 8819 base or simply come into bottom of cabinet.

Attach cabinet to 8819 base with hardware provided.

WALL MOUNT DIMENSIONS

8819 PEDESTAL MOUNT

Incoming power attaches to terminal strip in cabinet.

Drill holes and attach with concrete bolts (5/16 recommended).

Once unit is installed, fluids can be added to the unit. The 12000 Shampoo/Fragrance combo machine will need to use the half gallon containers rather than the full gallon containers. Now the unit can be turned on and programmed. **NOTE: Upon startup of the machine, all fluid lines will need to be primed to rid the lines of air.**

Programming Instructions:

Coin acceptor:

No programming to acceptor needed if unit was purchased with the standard Imonex Z32 electronic acceptor (8149-92 our part number) is pre-programmed to accept US quarters, .984 tokens, US \$1 coin and 1.073 token. Acceptor is pre-programmed before it is sent to J.E. Adams.

If different acceptor was purchased, see additional literature sent along with unit for programming info.

Bill acceptor:

Bill acceptor comes pre programmed from J.E. Adams and should not require any changes. If additional programming is needed to acceptors please refer to additional literature sent along with this unit.

Display:

Unit may be programmed when received depending on information given at that the time of order.

To program follow the instructions below.

Display programming with remote:

- 1) Press the red power button.
- 2) Timer will display 0000. At this time type in 4 digit access code. Note code will be 1234 until changed by customer.
- 3) Once code has been entered display should read ok. If display does not read ok, repeat step 1 and 2.
- 4) Press **CH +** button. Timer will display coin value. This should \$.25 and should not be changed.
- 5) Press the **CH +** button. Display will now read (**A: 30**) or may be a different time. (**A**) Will be the time per coin for the **VAC**. Set desired time per coin by using the **VOL -** to decrease or the **VOL +** to increase. Once time is entered move to next step.
- 6) Press the **CH +** button. Display will now read (**B: 30**) or may be different time. (**B**) Will be the time per coin for **TURBO**. Set desired time per coin by using the **VOL -** to decrease or the **VOL +** to increase. Once time is entered move to next step.
- 7) Press the **CH +** button. Display will now read (**C: 30**) or may be different time. (**C**) Will be the time per coin for **SHAMPOO**. Set desired time per coin by using the **VOL -** to decrease or the **VOL +** to increase. Once time is entered move to next step.
- 8) Press the **CH +** button. Display will now read **D**. **D** is not used.
- 9) Press the **CH +** button. Display will now read **E**. **E** is not used.
- 10) Press the **CH +** button. Display will now read **F**. **F** is not used.
- 11) Press the **CH +** button. Display will now read (on A). This is the number of coins to start **VAC**. Use the **VOL -** and **VOL +** to adjust. Once this is done press the **CH+** button and repeat for (B) **TURBO** and (C) **SHAMPOO**.
- 12) Press the **CH +** button. Display will read bonus time. Set if desired. See explanation at the end programming instructions.
- 13) Press the **CH +** button. Display will debit mode. Set if desired. See explanation at the end programming instructions.
- 14) Press the **CH +** button. Display will delayed start. Set if desired. See explanation at the end programming instructions.
- 15) Press the **CH +** button. Display will read **HLxx**. Set if desired. See explanation at the end programming instructions.
- 16) Press the **CH +** button. Display will read Restart off or restart on depending on what is set. Restart off will require a person to put in full amount after unit is turned off to reactivate. Restart on allows for additional coins to be put in the machine to keep unit running. To set use **VOL -** or **VOL +** to change.
- 17) Press the **CH +** button. Display will now read **STD** or **USER** or **MIX**. To make a custom message use **VOL +** button to scroll to **USER**. At this point press and hold **CH +** button until original message appears. At this time you may change the message simply by using the **VOL -** or **VOL +** buttons to change letters. **Once message has been entered you must put the symbol / at the end of message**. This will tell display that this is the end of the message.
- 18) Press the **CH +** button now 5 more times to exit programming.
- 19) Unit should now be programmed.

Program definitions:

Bonus time settings:

- Amount of time set in bonus time is added to regular time per coin/pulse(e.g. if you want to give 45 seconds for bonus time and your regular time per coin is 30 seconds, you would set bonus time at 00:15)
- Bonus is disabled by setting bonus time to 00:00.
- If bonus time is set to less than one minute, bonus time is added when bonus coin is reached and every coin after that until time expires.
- If bonus time is set at 1:00 or more, bonus will be a “one time” bonus. Bonus time will only be added for bonus coin or multiples of bonus coin (e.g. 16th coin, 32nd coin, etc). Any other coin will on receive regular time per coin.
- If bonus time is set to 99:00, when bonus coin is deposited, timer will show “-on-“ and timer will continue to run until coin switch wire is shorted to ground by a loop detector or other switch closure for a minimum of two seconds.

Debit and credit mode:

- Debit mode: As coins are deposited display shows “\$1.75 MORE, \$1.50 MORE, \$1.25 MORE” etc. until start price is reaches. Once start price is reached display switches to time accumulating until no more coins have been deposited.
- Credit mode: As coins are deposited display shows money accumulating (\$.25, \$.50, \$.75 etc). If timer is also set to delayed start mode timer will continue to show money accumulating until no more coins have been deposited. If timer is set to instant start, as soon as start price is reached, timer will change to time counting down.
- Both mode: As coins are deposited display shows money accumulating (\$.25, \$.50, \$.75 etc). If start price is not reached, after 5 seconds timer will alternate between “add \$x.xx more” and amount of money already deposited.

Display programming with push button:

- Unit can be programmed using buttons that are located inside display. One is labeled **S2**, which is used to change from item to item. One is labeled **S1** which is used to set desired value. If you hold down **S1** this will cause numbers to decrease. If you repeatedly push **S1** numbers will increase.
- When programming with buttons use same instructions as remote except for the following. Where it says to press **CH +** use **S2** and where it says to use **VOL +** or **-** use **S1**.

Operating Instructions:

- If the machine has multiple functions (ex 12000 has shampoo or fragrance), select desired function.
- Insert coins or bills to start desired function.
- If shampoo/spot is selected, it is recommended that you thoroughly vacuum before applying formula.
- To use shampoo function, toggle switch must be set to shampoo. The switch on the brush head is what selects the shampoo formula or the spot remover formula. To reduce amount of foam, set brush selector switch on handle to the middle (off) position to allow excess foam to be spread with brush.
- To use fragrance function, toggle switch must be set to fragrance and other toggle switch must be set to desired fragrance type. To spray fragrance, the button on the side of the fragrance gun must be held down. Do not spray fragrance material on decorative dash/console or door panel parts. It is recommended to spray under the seats.
- If other function is later selected after the original selected item, the unit will recalculate timer based on the amount of money it takes to start the specific function and reset accordingly.
- Once service is used, hang up hose(s).

Changing fluids:

Disconnect power. Unscrew cap from empty bottle. Remove empty bottle. Insert new bottle into unit or refill empty bottle. Insert air line into new/refilled bottle and screw cap on. Reconnect power and prime line if necessary.

Maintenance:

- **All servicing of machine should be conducted by an authorized service representative!**
- All fluid lines must be primed upon start-up of the machine and when changing fluids if necessary.
- To maintain performance, keep dispensing nozzles clean.
- Periodically inspect electrical wires and connections for wear or fatigue.
- Check inner cabinet fluid hoses and connections for cracks or wear on a weekly basis.
- Check shampoo and spot formula bottles regularly to assure they are full.
- Check external hoses, spray nozzle, and shampoo brush assembly for any signs of wear.
- Clean canister with a stainless steel cleaner as needed. Decals can be cleaned with mild soap and water.
- Each fluid line has a filter at the end of it which sits inside the fluid bottles; clean these filters as needed.

DISCONNECT POWER BEFORE SERVICING OR TROUBLESHOOTING!

Troubleshooting:

Problem	Possible cause	Solution
Unit is not powered.	Switch inside unit is not in the on position.	Flip switch on.
	No power to machine.	Check incoming power.
	10 Amp fuse on control panel is blown.	Replace fuse.
	Loose connection.	Check incoming power connection.
Display is not powering.	Open unit and check 24 volts coming out of transformer.	If no voltage, replace transformer.
Machine is behaving erratically.	Is the incoming power at 120V?	Check voltage and monitor while machine runs. Low voltage can cause erratic behavior.
	Are any of the machines wires worn through or connections not making contact?	Inspect wiring and connections. Look for sharp bends in wires and places where wire is against the metal chassis.

Display reads "closed" or "coin."	This indicates a continuous coin pulse coming to the timer or a shorted coin signal wire.	Disconnect coin signal wire at timer to see if problem goes away.
Display reads "error."	This indicated the program may be lost due to a bad battery or a power spike.	Reprogram timer, if problem comes back replace battery.
Display reads "aux."	This means continuous signal to auxiliary input.	
Display reads "fail."	Coin acceptor putting out continuous pulse.	Press mode button on display. If fail does not go away replace coin acceptor.
	Program in display may be lost.	Reprogram display. If fail goes away and then comes back, replace battery in display.
Fuse keeps blowing.	Compressor may be shorted out.	Un-wire compressor to see if problem goes away. If so, replace compressor.
Fluid will not draw through lines.	Is the pump coming on and turning?	Visually inspect pump, replace if necessary.
	Are line connections tight?	Fluids can dry out lines, clip ends and reattach, cable ties must be used for air-tight connection.
	Do lines need primed?	Cycle machine a visually watch from fluid coming out of bottles. Connections in lines must be tight!
	Are lines clogged?	Try using a bottle of hot water to draw through lines.
