LEATHER CARE

LEATHER DEEP CLEANER

LEXOL

- Leather is constantly exposed to dirt, sunlight, heat and humidity. Leather goods can be an expensive investment, but will look their best and last longer if protected with proper care.
- Lexol pH-balanced cleaner is purely a cleaner. There are no silicones, alcohols, waxes, oils, or additives that would interfere with its cleaning action or cause dirt to be trapped in the leather.
- This pH-balanced formula maintains the pH range of leather itself, which means it cleans leather safely as well as the stitching and other fibers that hold leather together. Its foaming action loosens and lifts dirt so it can be easily wiped away, leaving no tacky residue.
- Use on: leather auto upholstery, footwear, furniture, handbags & briefcases, sports equipment, and luggage
- Contains no waxes, oils, or additives that interfere with its cleaning capabilities
- Rinses easily, leaving leather healthy, supple and able to breathe
- Leaves no tacky residue

\$128.80	LEX1112	1 Liter	12 Per Case
\$27.13	LEX1108	8 oz	6 Per Case

LEATHER CONDITIONER

LEXOL

- Soften leather with this conditioner. It works to preserve and soften leather, as well as prevent cracking. Though leather can get dry, it can look and feel "like new" for many years if properly cared for. Lexol's liquid base allows the conditioner to penetrate the surface into leather pores, for deep conditioning that prevents cracking and premature aging.
- This liquid conditioner leaves no greasy residue and it contains no harmful silicon ingredients which dry out leather over time. Lexol conditioner results in supple, strong, and beautiful leather.
- Use on: leather auto upholstery, footwear, furniture, handbags and briefcases, sports equipment and luggage
- Protects leather against cracking and premature aging
- Leaves no greasy residue

What are the Best Detailing Towels?

A professional detailer usually has a towel in hand. In their back pocket, on their belt, in their coverall pocket. Towels are perhaps one of the most important – and most overlooked tools of the detailing trade.

What towels work best has as many answers as there are detailers! You can get answers by focusing the question – what towels work best in each part of the detailing process?

Best practices in detailing dictate that there be a logical progression to workflow. The answers to what are the best towels to use depends on knowing what stage of the detailing process we are talking about.

Every detailing job starts with washing the vehicle. Washing requires some reliable drying towels. Whether you prefer cotton or microfiber towels. Size, and weight matter. The best-selling vehicle drying towels are larger. The most popular sizes are 16"x24", 16"x27" or 24"x24". These sizes work best for cars, SUVs, and small trucks. Also, the best drying towels tend to be on the heavy side.

If you detail boats, RV's or even aircraft, consider a 20"x40" microfiber or cotton terry bath towels. You will find these and many other exceptional selections under Towels By Doctor Joe "Body Drying Towels" in the beginning of this catalog.

Next, you need rags. That's right, "rags". The door jams, trunk well, rocker panels ETC. are usually filthy. Worn out towels, cotton towel remnants, and inexpensive microfiber towels all work well for wiping and cleaning. You will find several varieties of cleaning cloths and inexpensive microfiber towels on the next page (Page 176).

What about Polishing Towels? We have some first-rate selections in buffing towels. Starting with the most popular thrifty selection (DJMF4500-XX-50) -- it is an all-purpose 16"x16", 300 GSM microfiber towel in nine colors. The many color choices are helpful in "color coding", assigning a specific color for an explicit task.

Also offered are plush 16" x 16", 16" x 24" and 16" x 27" cotton and microfiber towels. Rounding out the polishing cloth line, is Towelzilla, a monstrous 790 GSM microfiber towel, available 18" x 30" and 25" x 36". Towelzilla brings plush softness to a new level.

In looking at ceramic coatings, they have become a big part of the Profession Detailing industry. In response, Doctor Joe has developed several specialty products uniquely suitable for the application, leveling, and polishing of nano-coatings. These products are listed together under the heading of Detail Towels- Polishing on pages 178 and 179, following this article.

Many detail shops now offer "glass tinting." It is safe to assume that you can't have lint if you are going to tint! If you are in the business, it is critical to remember that all terry towels have lint. Cotton towels generate fiber lint and microfiber terry shed filament that looks like a light dusting of snow. Under "Glass Towels – Microfiber & Cotton" in the front of this catalog (Pages 36, 37 and 38), you will discover your prayers have been answered. Products like DJMF3600- XX waffle-weave microfiber towels perfectly clean glass and windshields, lint-free! For smears and streaks, the good doctor recommends DJMF5500-XX or DJMF5600-XX. The diamond pattern on these towels cut the white haze off glass like magic.

There are easy and inexpensive remedies for having perfect windshields. It is truly the last "important detail."

- Non-electric
- Proven, reliable components
- No installation required
