HIGH BODY UNDERCARRIAGE CLEANER

MOSMATIC

- The Mosmatic Undercarriage Cleaner makes it easy to clean the underside of vehicles. It can be used to clean cars, trucks and more. Agricultural and construction machinery can be cleaned on site without the use of a car lift. The Undercarriage Cleaner is time saving and cost effective. Can be used with hot or cold water. Rated for up to 4000 PSI, 250°F.

STABILIZER:

- When a stabilizer nozzle is installed on the Mosmatic Undercarriage Cleaner it has even more power. It will also increase the units reach. The version with the stabilizer nozzle also has a higher protective ring.
- The TUW is used with cold or hot pressure pumps
- Possible throughput medium pH 3 - 12
- 9" Clearance
- 3/8" NPTF
- Stainless steel wheels

HURRICANE PRO ADJUSTABLE UNDERCARRIAGE CLEANER

MOSMATIC

- With the Hurricane Pro model you are not only able to clean underneath vehicles, you also have the ability to pivot the spray deck which allows for multiple cleaning angles. Deck adjustment from 0° to maximum 90°.
- The adjustable angles allow for "all-around" cleaning on constructions machines, fleet vehicles, boats or agricultural machines using just one model undercarriage cleaner.
- Three large swivel casters make your cleaning job easier with full range of motion, allowing you to maneuver even on rough surfaces. Standard long range stabilizer nozzles on the Mosmatic Hurricane Pro increases the distance and impact of your cleaning project. Use this cleaning tool from Mosmatic with either hot or cold high-pressure pumps.
- 6" Swivel castor
- Pressure up to 4000 PSI
- Temperature up to 250°F
- Adjustable spray deck
- Complete stainless steel (INOX)

SELF SERVE EQUIPMENT

UNDERBODY CLEANING SYSTEMS

HYDRO-SPRAY

WASH SYSTEMS, Inc

SELF SERVE UNDERBODY CLEANING SYSTEM

HYDRO SPRAY WASH SYSTEMS, INC.

- **SIMPLE SYSTEM DESIGNED TO OFFER ADDITIONAL SERVICE**

WHAT IS THE SELF-SERVE UNDERBODY SYSTEM?

- The Self-Serve Underbody System gives vehicle owners the option to clean the undercarriage of their vehicle—a highly valued option during winter months when road salt can cause costly, corrosive damage to many vehicles.
- The underbody tool has a simple design allowing for safe and easy operation. With the turn of a dial and the squeeze of a trigger, three nozzles release a high-pressure spray that will remove salt, dirt, grime and debris.
- This system is a value adding service that installs directly into any existing serve-serve bay. Creating an entirely new cleaning option, this system increases the amount of time customers spend in the bay, produces additional revenue and increases customer loyalty. This cleaning option appeals highly to car wash operators in colder climates where vehicle owners are at an increased risk for corrosive damage as a result of road salt.

HOW DOES THE SYSTEM WORK?

- Utilizing one high-pressure stream—coming from any existing self-serve equipment—this system powers two high pressure cleaning tools. By installing this system's unique control valve panel operators maintain the existing high pressure flow to their self-serve bay while also creating a second high pressure option that, powers the underbody cleaning tool.
- Activating the underbody cleaning tool can be achieved by adding an underbody option to any existing meter box. If this is not the case, adding a push button activation may be required to activate the underbody system.
- Within the bay, a wall-mounted boom, hose, wall bracket and weep bucket are installed to house the underbody cleaning tool. To prevent this exposed fluid line from freezing, a check valve assembly is used to connect any existing water weep system to the underbody system. The weep bucket is then needed to catch and drain any resulting weep water.

HOT WAX & SHINE

SIMONIZ

- Gone are the days of painstaking waxing by hand! Give your busy customers a waxed and shiny car in no time at all by incorporating Simoniz Hot Wax and Shine into your self-serve car wash bays. Hot Wax and Shine has a special formula that uses real carnauba wax, liquified and distributed across a clean car. When buffed or rinsed away, it leaves the vehicle ultra-shiny and protected!
- In self-serve bays, it is easily applied by hand through a dedicated foam hose and gun
- Simoniz® Hot Wax and Shine is a major profit driver at car washes across the country. By offering this specialized product, operators are able to increase the price of their top wash packages - or even create a new top package at a premium!
- Use 2 - 4 oz per car.

WASHING INSTRUCTIONS

Insert bills/coins/credit card to start Dog Wash.
Extra money may be put in at startup or anytime before meter stops for additional time. If using a credit card, swipe to finish.

Turn selection to Disinfectant/Tub Cleaner and quickly rinse tub to sanitize it before putting your pet in tub.
CAUTION-DO NOT USE DISINFECTANT ON YOUR PET

Walk pet up non-slip ramp and attach collar to restraint leash or use slip noose leash on smaller dogs or when bathing dogs without a collar.

Switch to SHAMPOO selection to thoroughly lather and scrub pet with Tearless Concentrate Shampoo.

Switch to RINSE selection to thoroughly rinse pet.

Switch to CONDITIONER selection. Use to make pets coat soft, silky and pleasant smelling. Thoroughly rinse off after applying.

Switch to Dry selection and pick up dryer hose. Gradually move nozzle closer to pet so as not to startle them.

OPTIONS - VETERINARY GRADE SHAMPOO - Use as a regular shampoo, or to use as a treatment lather, scrub and leave on pet a few minutes before rinsing. OATMEAL TREATMENT - Use if your pet has dry skin. Lather, scrub and leave on pet a few minutes before rinsing. DE-SKUNK - Use the optional Deskunk selection if needed. Lather, scrub and leave on pet a few minutes before rinsing. Repeat as needed.

Switch to FRAGRANCE selection. Select fragrance from FRAGRANCE DISPENSER and spray on dog.

SELF SERVE EQUIPMENT

FREEZE PREVENTION

EASYHEAT®

EASY HEAT SELF REGULATING PIPE HEAT SYSTEM FREEZE PREVENTION

HOW IT WORKS:

- A special self-regulating core is at the center of the Freeze Free cable. This core is conductive and adjusts according to the surrounding temperatures. When it is cold, the cable's core has many conductive paths that generate enough heat to keep the water flowing in the pipe.
- Grounded 30" cord-set requires less heating cable
- Power indicator light
- Built-in, fast-reaction fuse
- Easy to install

HOW TO CALCULATE THE EXACT HEATER LENGTH YOU NEED:

Multiply the cable length required per foot of pipe by the length of your pipe. Add one extra foot for each valve located in your line. Maximum cable length is 75 feet.

Cable length required per foot of pipe x pipe length
+ one foot for each valve or spigot = total cable length

EASY HEAT CONNECTION KIT FREEZE PREVENTION

- Includes plug & end seal

\$23.52 EH58252K

EASY HEAT FREEZE-FREE CABLE FREEZE PREVENTION

- Sold per foot

SUBZERO ANTI-FREEZE SYSTEM HYDRO-SPRAY FREEZE PREVENTION

STANDARD FEATURES:

- Simultaneous Anti-freeze/blowdown
- Customizable Operating Parameters
- No Water Weep
- Digital Display Thermostat
- Idle Repeat
- Auto Blowdown
- Manual Blowdown
- Auto Anti-Freeze
- PLC Controlled
- Auto Reset
- Pre-Plumbed
- Pre-Wired
- 1 to 7 bay configurations

BENEFITS:

- Services All Types of Exposed Fluid Lines
- Green for the Environment
- Ease of Installation
- Plug & Play
- Piece of Mind
- Lower Water & Sewer Cost
- Fail-safe Protection
- Minimize Ice Build Up

NO MORE WEEPING!

Simply a Green, Efficient, Cost Saving,
Peace of Mind for Freeze Control!

SUBZERO SPECIFICATIONS:

- INPUT VOLTAGE - 120 VAC 60Hz
- CURRENT CONSUMPTION - 2 AMPS (MAX)
- WATER REQUIREMENTS - 1/3 GPM Per Nozzle (Used when water weep is active)
- AIR REQUIREMENTS - 5.7 CFM • AIR PRESSURE RANGE - 0 PSI to 80 PSI (Set through Pressure Gauge)
- ANTI-FREEZE REQUIREMENTS - Recommended Propylene Glycol or Ethylene Glycol
- FLOJET OPERATING PRESSURE RANGE - 20 PSI to 80 PSI (Max Operating Pressure = 80 PSI)
(Max Operating Temperature = 120°F)
- POLY TUBE MAX WORKING PRESSURE - 120 PSI
- RECOMMENDED AIR PRESSURE RANGE FOR BLOWDOWN - 25 PSI to 65 PSI
- RECOMMENDED AIR PRESSURE RANGE FOR ANTI-FREEZE PUMP - 25 PSI to 65 PSI

SELF SERVE EQUIPMENT

FREEZE PREVENTION

DIXMOR WEEP MIZER FREEZE PREVENTION

- The DX1000 is a microprocessor controlled system which will automatically cycle your existing normally open solenoid valve (normally closed optional), depending on outside temperature. When it starts it only runs water for a few seconds and as the temperature drops it automatically stays on longer and longer until it finally stays on 100% of the time. This is all controlled by the settings you program into the unit, or you may use the built-in program. You may wish to install sensors in two locations and the Weep Mizer will automatically operate from the coldest one.
- Cycles your weep system on and off for maximum dollar savings
- Continuous display of outside temperature for your convenience
- Use of multiple sensors possible; weep system controlled with coldest reading
- Battery backup to eliminate reprogramming in case of power failure
- Built in "FAIL SAFE" program for peace of mind operation
- Easily programmable with two push buttons
- Maintains memory of what time temperature was below turn on point, time water actually ran, in hours, high/low temperature since last reset.

\$39.99 **TISENSOR**

FOR WEEP MIZERS PURCHASED BEFORE 2/22/10

THE WINTERTIME CAN BE THE MOST PROFITABLE TIME OF YEAR FOR CAR WASH OPERATORS. KEEP AN EYE OUT FOR THE THINGS THAT CAN CAUSE YOU HEADACHES AND DOWNTIME IN THE BUSY COLDER MONTHS.

TIPS TO AVOID A COSTLY FREEZE AT YOUR WASH

- Make sure your weep system is working properly.
- Check the controls, be it a Weep Mizer or thermostat, to make sure it's reading the temperature correctly and sending power to the weep solenoid.
- Check the normally open solenoid to make sure it functions properly, and check to make sure your guns are allowing adequate weep water through.
- If you have floor heat, ensure your zones are heating adequately. Check the pressure of your floor heat system and add anti-freeze if needed.
