Motor City Wash Works, Inc. was founded in 2004 and has grown to become a respected leader in the car wash industry. This reliable car wash company focuses on tunnel wash systems and other automatic equipment. They offer quality systems in a variety of sizes to fit different customers' applications. They also offer fleet systems for auto dealerships, vehicle rental agencies, and truck fleets. Regardless of your type of wash, Motor City will customize your system for things like performance needs, location size, and branding. Motor City Wash Works is fixated on setting the industry standard for innovation, durability, and performance.

Kleen-Rite carries an ample selection of new parts that are designed for use with Motor City Wash Works equipment. We can be your supplier for smaller parts like valves, nozzles, and rollers, as well as larger components like pumps and motors that are compatible with Motor City car wash systems. As with all of Kleen-Rite's products, you'll be sure to find the Motor City Wash Works parts you need at the most competitive prices on the market.

If you're a new owner of a Motor City Wash Works car wash system, it's crucial to select a parts supplier that you can trust to help service and maintain your equipment. Why not start off on the right foot and go with Kleen-Rite right away? If you've had a Motor City Wash Works system for years and are starting to realize that you're paying too much for your replacement parts, make the switch to Kleen-Rite and get yourself on the right track.

Browse our full listing of Motor City Wash Works replacement parts at kleen-ritecorp.com. You can also contact our sales team to discuss your needs and get advice on the parts you're going to need to keep your Motor City Wash Works system running at peak performance!

AUTO ALERT TREADLE SWITCHES

RECORA

- **AUTOMATIC VEHICLE DETECTORS FOR COMMERCIALS AND INDUSTRIAL USE**
- Ideal for turning equipment on without touching cars
- Rugged enough to work under multi-ton trucks
- Easily wires to lights, horn, bells, or any signaling device
 - Molded to 3/16" steel base plate, 7/8" thick, mounting holes on corners
- Standard sensitivity to 10-15 lbs.
- Standard lead wires are 20' of 18 AWG
- Lead lengths can be up to 150'

PARKER ROSS MOTORS

- Provides low-cost hydraulic power for medium to light duty applications
- Fully interchangeable with industry standards for porting, standard shafts & mountings
- Zero-leak commutation valve provides greater, more consistent, volumetric efficiency
- Full-flow lubrication maximizes cooling & extends motor life up to 50%
- Patented 60-40 spline member arrangement transmits more torque with less weight
- Full interchangeability with other motors - designed according to industry standards
- Unique high-pressure shaft seal - eliminates need for case drains
- Up to 13 HP output

FEATURED PRODUCT

CHAR-LYNN MOTORS

Char-Lynn designs each motor for optimum performance. Each LSHT motor provides high-torque strength without the stress of fast-moving parts that can cause damage. They are excellent for conveyors that need power to move objects yet do not need to operate at a quick pace.

LOW SPEED

Motor start-up speed causes a spike in energy usage. Char-Lynn's low-speed design provides smooth operation at all times, from start-up to shut-down, to extend the life of the motor.

HIGH TORQUE

Char-Lynn hydraulic motors transform fluid energy into mechanical power. Power is the result of speed and torque, and high torque is required to start a load moving.

COMPACT & COST-EFFECTIVE

The LSHT motor eliminates the gearbox to save space and lower costs! Only 3 primary components are needed to transmit torque through the motor: starter, drive, and output shaft.

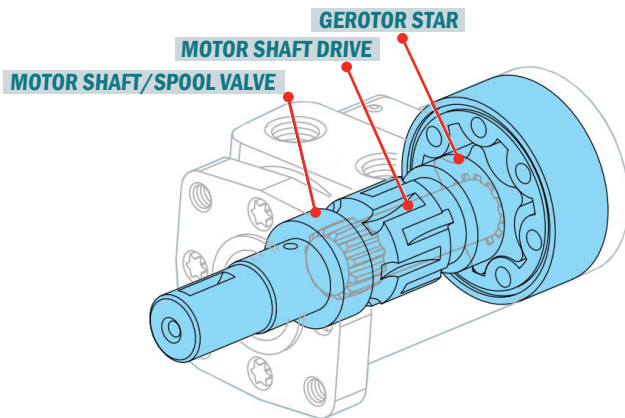

REVERSIBLE DESIGN

These motors let you reverse the direction of hydraulic fluid flow, without losing torque! Plus, the motors mount directly to the driven device.

GENERAL PURPOSE MOTORS

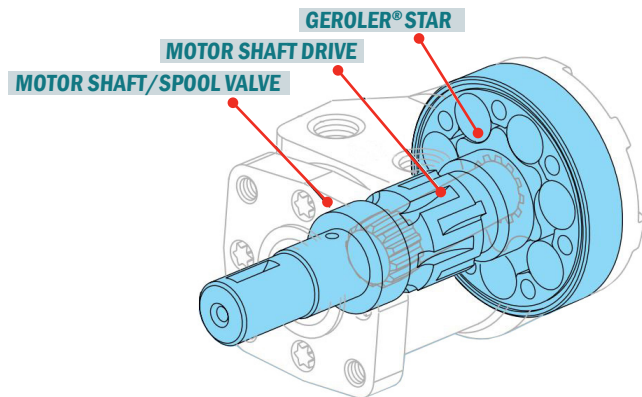

When choosing your motor, consider the following motor specs: pressure range, speed, torque, and fluid compatibility. You can shop for many popular models from the Char-Lynn H Series and S Series at Kleen-Rite.

H SERIES MOTOR

- Economical and compact
- Designed for medium duty applications.
- Features an industry-proven spool valve design with state-of-the-art gerotors
- Geroters offer fluid-tight sealing for leak-free performance. Great for conveyors and car wash brushes!
- Equipment can be driven direct to save costs

S SERIES MOTOR

- An S Series motor with a Geroler has a compact size and an optimized drive running angle to improve mechanical efficiency
- Within the Geroler, rollers provide support as the starter rotates. This minimizes friction and promotes efficiency, especially at start-up and low speeds
- Leak-free performance and smooth operation

|---------|---------|--|
| \$24.87 | JL47102 | 550 EXTREME ANTI-SEIZE LUBRICANT WITH BRUSH TOP 1 LB. - Enhanced rust and corrosion resistance. Lead free. Protects against seizure, heat-freeze, galling, rut and corrosion. Lowers friction, reduces wrench torque. Provides easy makeup and breakout. Reduces maintenance costs. Not affected by contraction, expansion, or vibration. |
| \$12.19 | JL35050 | ARCTIC LOW-TEMPERATURE GREASE CARTRIDGE 14 OZ. - Designed for extreme cold weather environments where fluid film strength is important and grease consistency remains the same. It is ideally suited for applications that experience working environments at subzero climates. |
| \$14.38 | JL33050 | 202 MOLY-LITH MULTI-PURPOSE GREASE CARTRIDGE 14 OZ. - Excellent for rack/pinion grease cups, drive shaft idler arm and ball joints. Specifically formulated to protect your equipment from premature damages that can occur from dirt, dust, and sediments. |
| \$15.63 | JL37341 | 769 LUBRICANT AEROSOL 12 OZ. - unique in that it lifts and displaces moisture, rather than trapping it. Pores and crevices of surfaces are freed from moisture and are coated with a thin non-greasy film that prevents additional moisture from clinging or entering. |
| \$16.52 | JL34041 | WRL WIRE ROPE & CHAIN LUBRICANT AEROSOL 12 OZ. - quickly penetrates wire rope and cable to the core and builds a shield against offshore weathering conditions. It's highly resistant to rain and salt water atmospheres and is a water displacing spray and lubricant. |
| \$27.78 | JL73560 | SILICONE COMPOUND DM 5 OZ. - Dielectric, translucent paste that provides excellent lubrication and sealing properties for plug and gate valves, stuffing boxes, o-rings, vacuum and pressure systems. |
| \$25.23 | JL32460 | 5.30Z MP SILICONE GREASE - Designed compatibility for O-ring materials including Buna-N, Viton, HSN, Teflon, nitrile, and nylon. Ideally suited as an insulator for electrical connectors against the elements. |

FOAM GENERATORS

EASY CLEAN CAR WASH FOAM GENERATOR

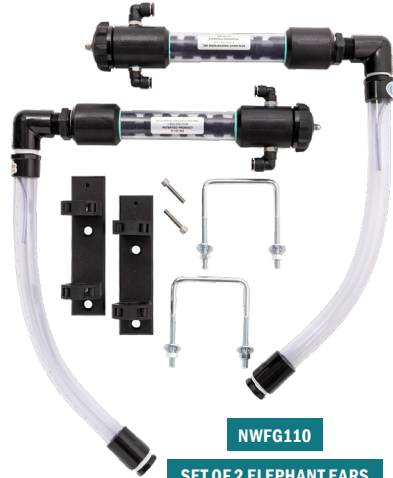

NEW WAVE INNOVATIONS, INC.

- The easy clean generator is a revolutionary foam generator that takes the trouble out of cleaning your chemical application foam generators - no tools needed since there are no fittings to take apart or any air and chemical lines to disconnect!
- The media is made up of two types: one that mixes and one that foams
- No need for the needle valve or check valves because the media is suspended to the twist off cap so that the media does not compress in the foam chambers, creating unpredictable back-pressure and flow resistance
- Installation is a snap - each unit comes with direct fit air and chemical fittings and outlet sizes to fit your applicators
- Cleans in seconds, not minutes
- Uses less chemical to create a dramatic show of foam, color and scent that your customers will love and come back for over and over again!
- Reduce expenses in labor, water and chemicals!

TIRE CLEANER WITH 21" STAINLESS STEEL HOUSING

MOSMATIC

- The water pressure makes the rotor arm begin to turn on its own. The design is constructed so simply that any maintenance work can be carried out independently and very quickly. These products are found mainly in automatic car wash facilities in the area of rim/tire cleaning and lateral finish cleaning. It is an efficient and reliable method of achieving optimal cleaning results.

KNOW WHEN TO REPLACE YOUR CLOTHS

Even the most experienced and conscientious operators eventually have to replace their cloth. Don't wait until the last minute to replace your cloth (when you have a series of damage claims or you start to lose customers because you are not doing a good enough job of cleaning their cars).

Excessive amounts of fraying and tearing at the tips of the cloth is a good indication it needs to be replaced.
