CONVEYOR TUNNELS

Professional Tunnel Car Wash Soaps, Sealers and Detergents

Offering plenty of options in your car wash tunnel means that customers get the exact wash they desire, and you enjoy a higher ticket per customer. There are plenty of amazing soaps and chemicals that can be added to tunnel car washes. Commonly used formulas include wheel/tire cleaners, presoaks, and foaming soaps. Premium services include triple foam formulas, clear coats, waxes and protectants, tire shiners, and drying agents. Make absolutely sure that your customers get everything they want from their wash in your tunnel!

CONVEYOR TUNNELS

WHEEL BRITE

KLEEN-RITE **KLEEN-RITE**.com

- Low pH.
- Economical and effective low pH formula. Removes brake dust and cleans wheels. Simply spray on and rinse off.
- Cleans rims, wheels, and hub caps.

Tire Shiner

SIMONIZ PLUS

SIMONIZ®

- Alkaline presoak.
- Formulated for use as either a single-step presoak or as the second step in a two-step detergent wash process. Medium foam levels.

PART #	SIZE	DILUTION
DR55254	55 Gallons	200-400:1

Presoak

You might need to test out what tunnel car wash chemicals work best for your climate, customers, and environmental situation. Try out various chemicals by purchasing 5-gallon jugs, then move on to bulk 30 and 55-gallon drums when you figure out what works for your tunnel!

CONVEYOR TUNNELS

LOW PH CONDITIONER

KLEEN-RITE

KLEEN-RITE CORP.

- Triple foam.
- Wow your car wash customers with dazzling, vibrant triple foam! Low pH triple foam is super concentrated and creates terrific foam! Kleen-Rite's low pH conditioner is the ideal product for triple foam arches or self-serve foam guns. It produces thick foam, an appealing color, and a pleasant fruity scent. Complete the conditioning process with sealant (sold separately) for optimal results.
- Add 10 gallons of water.
- 5-gallon concentrate makes 15 gallons of soap.
- Use yellow metering tip.

Triple Foam Arch

UVP TRI FOAM POLISH

SIMONIZ®

SIMONIZ

- Simoniz UVP is an ultra-concentrated triple foam conditioner for clear coat finishes. This high-foaming polish has amazing visual appeal and offers UV protection for vehicle surfaces. Customers will love the car wash experience, and they'll be even more satisfied when their car looks great! Best used in conveyor tunnel car wash applications.
- High foaming.
- 5-gallon size.
- Cleans and shines while providing incredible UV protection.
- Great for use in arch in conveyor applications.
- Acidic cleaning compound - less than 4 pH.

PART #	COLOR	SIZE	DILUTION
PA5352	Magenta	5 Gallons	125-150:1
PA5351	Violet	5 Gallons	125-150:1
PA5350	Blue	5 Gallons	125-150:1

Triple Foam Arch

THE MORE YOU KNOW...

Typically offered in conveyor tunnel applications, triple foam offers a delightful visual display of blue, pink, and yellow color foam. That means customers can very clearly see the car wash chemicals going to work on their vehicle! Triple foam also invigorates a customer's sense of smell with a pleasant fragrance. Tunnel car wash customers expect to be dazzled when they go through your wash. That means providing a full sensory experience in addition to a quality wash.

Of course, the thick rich foam is also beneficial in a practical way. It grabs onto car surfaces and clings long enough to offer ample dwell time so the detergent can do its job. The result is a properly washed car finished with an incredible shine!

Triple foam is an excellent way to impress customers while also effectively cleaning, conditioning, and polishing vehicle exteriors.

Conveyor tunnels are a growing segment of the car wash industry, and Kleen-Rite has a huge selection of chemicals to choose from for these applications.

With a little reading to learn the details about each chemical, some creativity, and a bit of experimentation to find out what works for you, you'll be on your way to building a reputation as the best express tunnel in your area!

- Have an ample variety of products in your tunnel so you can build different wash packages for customers to choose from.
- Consider asking your regular customers what they like in your tunnel, and what they think is missing from it. You may not be able to please everybody, but this feedback is incredibly valuable to building the perfect wash packages in your tunnel.
- Shop Kleen-Rite to find tunnel arches, signs, and banners to advertise your chemicals. Make sure customers are aware of the quality products being used in your tunnel!
- Offer a two-step low pH and high pH presoak process to get the best results. Having both acid and alkaline-based presoaks and detergents means all the different kinds of dirt, grime, and grease are tackled when vehicles go through your wash.
- Make sure you have proper dilution equipment and accessories for the chemicals you choose. By having correct dilution, you hit that sweet spot where the chemical is effective without wasting any product.
- This guide might be about chemicals, but don't forget that Kleen-Rite has an amazing array of rollers, chain, sensors, brushes, and other tunnel parts to service and maintain your wash!

IN BAY AUTOMATICS

***Chemicals and Detergents for
both touchless and friction style
automatic units***

Kleen-Rite offers the Kleen-Track system for in-bay automatic car washes. This two-step process uses a strategic application of low pH liquid presoak followed by a high pH liquid presoak that removes dirt and grime in the early stages of a touchless wash. Other automatic chemical options include wheel cleaner, polymer-based protectants, wax, and triple foam conditioner. Conveniently offered in several different forms like liquid, powder, or hyper-concentrated.

IN BAY AUTOMATICS

KLEEN-TRACK 1A

KLEEN-RITE **KLEEN-RITE**.^{corp}

- Step 1 - Low pH.
- The strongest, most effective low pH liquid presoak in the Kleen-Track line. This product is formulated for use as a first step in a two-step touchless wash process.

PART #	SIZE	DILUTION
KRKT1A5	5 Gallons	75-12:1

KLEEN-PAK

**Compact, convenient, easy-to-store
hyper-concentrate chemicals**

Concentrated car wash soaps and chemicals are the right solution for your crowded, compact control rooms. Each Kleen-Pak 5 gallon refill pack contains two 2.5 gallon easy-pour jugs. 2.5 gallon jugs really help save space instead of a 55 gallon drum in the middle of the equipment room. Handling and storage of these convenient containers makes it really easy to use. The smaller jugs translate into huge savings on shipping costs. Unlike other soap distributors, we don't lock you into an application system, so you have the freedom of choice when it comes to your automotive washing solutions. Dump the drum and start saving

KLEEN-PAK

- Concentrated formula - two 2½ gallon jugs.
- This Kleen-Pak High pH is a liquid presoak for self-serve and automatic tunnels that doesn't charge the car's surface and renders it ready for rinsing and shining. Can be used as a single-step presoak or as a two-step process in combination with low pH products. Concentrated chemicals have a smaller footprint than pre-mixed chemicals; any experienced car wash operator knows the importance of saving space!

BUG BUSTER INSECT REMOVER KLEEN-RITE

KLEEN-PAK
KLEEN-PAK CORPORATION

- Concentrated formula - two 2½ gallon jugs.
- Keep your customers happy all spring and summer long with Kleen-Pak Bug Buster! Green in color, this fluid is the perfect addition to your car wash system during the warm months when many bugs are active. Soaps and detergents alone may not get bug splatter and residue off of vehicles - especially when it's been "baked on" in the hot summer sun! Let customers know you use this reliable Kleen-Pak product to ensure their vehicles leave shiny, clean, and free of any remaining bug spots!

SELF-SERVE

Professional Self-Serve Car Wash Soap, Wax and Detergents

The most recent advancement in the formulation of vehicle wash detergents and waxes has been the development of ultra concentrated products. These products are more concentrated versions of the traditional wash products in use today. These formulations contain a higher percentage of active ingredients and less water. This benefits the car wash operator in many ways. The five gallon containers require far less storage area and are much easier to handle and dispose of than those bulky 55 gallon drums.

SPECIALTY CHEMICALS & LAUNDRY

Removing insects and salt is very important to regular car wash customers. Operators typically offer Bug Remover during the hot summer months, and DeSalt in winter when snow and ice are on the roads. Other specialty chemicals include wall-cleaning formulas and eco-friendly water-based hydraulic fluid. Our laundry chemicals clean and brighten both colors and whites. Powerful formulations for heavy soils and bulk amounts for busy, high-volume car washes and professional laundry businesses!

SELF-SERVE DOG WASH TREATMENTS

Dog Wash Shampoos and Treatments are specially-formulated for dog and pet fur, and are best used in conjunction with the Kleen-Rite Dog Wash. Use shampoo for general cleaning purposes or a conditioner to improve fur quality. For special cases, customers might want an oatmeal treatment for dry, itchy skin, a de-skunk formula for sprayed dogs, or a veterinary grade shampoo to keep pests off their pet. Tub cleaner also available for Dog Wash disinfecting.

DOG WASH

TEARLESS SHAMPOO RTU

KLEEN-RITE CORP.

- Deep cleaning that leaves dog's coat soft and fluffy. Plus it's ready to use right out of the container, with no dilution needed. pH balance matches the natural pH of dog's fur and skin.

AUTO DETAIL & POLISHING

Kleen-Shine professional detailing chemicals...

Kleen-Shine detail chemicals and polishes are specifically formulated to deliver outstanding results and labor savings to car wash detailing operations. The extensive line of Kleen-Shine products for express and full-service detailing are designed to work quickly, effectively.

Our high-quality, cost-effective formulations deliver superior results faster, without leaving any time-wasting or harmful residues.

DETAIL & POLISHING

FINAL MIST DETAIL ENHANCER

KLEEN-SHINE™

- Use as the last step of the car detailing process. Spray on and wipe clean with a towel. Cleans away dust, light soil, polish residue, and fingerprints to enhance gloss and leave a deep, high shine.
- Ideal for boosting shine on just-washed vehicles.
- Contains enough protective ingredients to be considered a spray wax, yet it has the lubricity and cleaning ability of an easy-to-use detail spray.
